### **THE EFFECT OF COMMISSIONER COMPOSITION AND OWNERSHIP STRUCTURE ON DIVIDEND POLICY IN THE BANK INDUSTRY IN INDONESIA 2013-2021**

The banking industry is an industry that can support other industrial sectors either directly or indirectly. This study examines the effect of board size, board independence, board meetings, state ownership, institutional ownership, Managerial ownership, family ownership and foreign ownership of dividend policies proxied by dividends per share in the banking industry in Indonesia. This research is a type of quantitative research with panel data regression analysis techniques. The results showed that the number of commissioners and institutional ownership did not have a positive and significant effect on dividend policy, while state ownership had a positive and significant influence and institutional ownership had a negative and significant effect. Other variables do not have a significant influence on the company's dividend policy.
