“ANALYSIS OF FACTORS THAT INFLUENCE TIKTOK USER SATISFACTION IN THE DIGITAL WORLD”

In the current Industry 4.0 era, advances in digital technology have changed and impacted many aspects of human life, including the industrial world and the educational sector. As time goes by, more and more people are using the social media TikTok. However, with the emergence of negative effects, it raises the question of whether TikTok users, both new and old users, will continue to use TikTok. This research aims to analyze the factors that influence TikTok user satisfaction in the digital world. Research data was obtained from a questionnaire with 29 indicators, and distributed to 200 respondents. Respondents in this study were users of the TikTok application. Data processing uses PLS-SEM on SmartPLS. The results of this research show that TikToker attractiveness has no positive effect on Informational social influence, TikToker attractiveness has a positive effect on Normative social influence, Co-viewer participation has no positive effect on Informational social influence, Co-viewer participation has no positive effect on Normative social influence, Platform reputation has no positive effect on Informational social influence, Platform reputation has a positive effect on Informational social influence, Content appeal has a positive effect on Informational social influence, Content appeal has a positive effect on Normative social influence, Informational social influence has a positive effect on Continuous intention, Normative social influence has a positive effect towards Continuous intention.

Keywords: TikToker attractiveness, Co-viewer participation, Platform reputation, Content appeal, Informational social influence, Normative social influence, Continuous intention.
