THE INFLUENCE OF ENVIRONMENTAL CONCERN AND HEALTH CONCERN TOWARDS PURCHASE INTENTION TO BUY ECO-FRIENDLY PACKAGED PRODUCTS MEDIATED BY ATTITUDE TO BUY ECO-FRIENDLY PACKAGED PRODUCTS

(xv + 121 pages; 8 pictures; 32 tables; 4 attachments)

The impact of plastic production on the environment has become a serious issue, particularly in Indonesia. This study aims to understand the knowledge, attitudes, and participation of the community in relation to plastic waste management, with a focus on environmentally friendly packaged products at the bottled drinking water company Danone AQUA, which introduced Aqua Life, a bottle made from 100% recycled material. The study results are expected to provide insights into the factors motivating consumers' purchase intention to buy eco-friendly packaged products, exploring the roles of environmental concern and health concern, as well as attitude to buy eco-friendly packaged products. This study contributes to the development of sustainable product marketing strategies and enhances understanding of influencing factors on consumers' purchase intention to buy eco-friendly packaged products in the Indonesian market. The research employs the PLS-SEM 4.0 method for analysis. The questionnaire was distributed using purposive sampling, a non-probability sampling method, since each sample to be taken does not have an equal chance of being selected, specifically targeting respondents who are currently or will be using the bottled drinking water brand Aqua Life in the Jabodetabek area. The research was conducted online through social media platforms to reach the target respondents using Aqua Life products and residing in the Jabodetabek region, Indonesia. The research period took place from September to November 2023, with a total of 200 respondents. The research findings indicate that health concern and environmental concern, as well as attitude to buy eco-friendly packaged products, positively influence the purchase intention to buy eco-friendly packaged products. Furthermore, health concern and environmental concern also have a positive impact on the attitude to buy eco-friendly packaged products.

Keywords: *health concern, environmental concern, attitude to buy eco-friendly packaged products, purchase intention to buy eco-friendly packaged products, Bottled Drinking Water Aqua Life*
