Banking is one of the most important industries in the Indonesian economy. The banking sector provides a variety of products including financial-related services. This research wants to know the influence of Service Quality, Customer Satisfaction, Perceived Value and Corporate Image by BCA bank in DKI Jakarta on Customer Loyalty through the mediation of the Trust variable. This research uses a quantitative approach through an online survey of 120 sample respondents and analyzed using Smart-PLS software. The results of this research show that Service Quality, Perceived Value and Corporate Image have a positive effect on the mediating variable trust. Apart from that, Perceived Value and Corporate Image have a positive effect on the Customer Loyalty variable. However, this research also does not support the relationship between Customer Satisfaction and Trust and Customer Loyalty and does not support the relationship between Service Quality and Customer Loyalty. The trust variable itself also found no relationship with the customer loyalty. As a form of managerial implication, this research shows that Service Quality, Customer Satisfaction, Perceived Value and Corporate Image are important things for the banking industry.
