THE INFLUENCE OF RISK BASED CAPITAL, ASSET TANGIBILITY, PREMIUM GROWTH AND CLAIM RATE ON PROFITABILITY IN INSURANCE COMPANIES FOR THE 2017-2021 PERIOD

(xv + 79 pages: 20 tables; 3 figures)

Insurance is an entity that plays an essential role in the context of financial protection, considering that every individual in the course of his life cannot avoid various risks, dangers, or potential losses. The purpose of this study was to determine and analyse the relationship between Risk Based Capital, Asset Tangibility, Premium Growth, Claim Rate to Profitability. This research was conducted in insurance companies in 2017-2021 with a research sample of 15 companies. This research method uses panel data regression analysis. The results of the research analysis state that Risk Based Capital has a significant negative effect on profitability, Asset Tangibility has a positive and significant effect on profitability, Premium Growth has no significant effect on profitability, Claim Rate has no significant effect on profitability.
