ACKNOWLEDGMENTS

Foremost, the author would like to express her deepest gratitude to the Merciful Lord for the gift of faith and knowledge. This thesis, titled “The Correlation Between Sound Sensitivity and Affective Reactivity of Nurses in Jakarta: A Pilot Study” is submitted to obtain a Bachelor’s degree in Psychology from the Faculty of Psychology, Universitas Pelita Harapan. The author would like to extend her heartfelt appreciation upon the completion of her thesis to the following people:

1. Yonathan Aditya, Ph.D., as Dean of the Faculty of Psychology.
2. Ruth Sumule, S.Psi., M.Psi., as Head of Program at the Faculty of Psychology
3. Karel Karsten, M.Psi, Andrew Schuttinga, M.S., and Barnabas Januario, M.Psi., as supervisors who each showed enthusiasm in the spirit of adventure for academic research. It has been a great privilege to work under their supervision. Without their assistance, constructive criticism, and sincere encouragement, this thesis would not have been possible.
4. Kartika C. Kirana, M.Psi. and Kartika Sitorus, M.Psi as the author’s academic advisors whose guidance, discipline, and support had a lasting effect as an undergraduate student.
5. To all lecturers and staff at the Faculty of Psychology for their immeasurable patience and eagerness in teaching. May you be blessed to
continue passing on your knowledge and devotion in academia throughout the many years to come.

6. The late Roger Anthony Wait, B.Sc., his remembrance has kept the author resolute in the face of many obstacles and hardship. The author’s family; Adhykara Rachmandika, Rowena Wait, Rini Yuniarsih, and Christine Savage, the author would not have made it this far without their prayers and endless motivation. A special debt of gratitude is due.

7. To all the respondents in this research who provided time in between their duties to complete the questionnaire.

8. To the batch of 2012 for the gift of friendship and endless motivation in the pursuit of academic success. Always keep in mind that storms make trees make bigger roots.

The author is very aware of the many flaws in this thesis, therefore input and criticism from readers will be more than beneficial for the author in future studies.

LIST OF APPENDIXES xii

CHAPTER 1 INTRODUCTION
1.1. Background 1
1.2. Identification of Problem 10
1.3. Research Objectives 11
1.4. Research Benefits 11

CHAPTER 2 THEORETICAL BACKGROUND
2.1. Sound and Noise 13
  2.1.1. Definition of Sound and Noise 13
  2.1.2. Sound and Noise Sensitivity 13
  2.1.3. Measurement of Sound Sensitivity 15
  2.1.4. Intervention Methods for Sound Sensitivity 16
2.2. Affective Reactivity 16
2.3. BPJS Kesehatan Health Care Facilities 19
  2.3.1. Social Security Health Benefits (BPJS Kesehatan) 20
  2.3.2. Nursing 20
  2.3.3. Noise Level Standards in Health Care Settings 21
2.4. Theoretical Framework 22
2.5. Hypotheses 24

CHAPTER 3 RESEARCH METHODOLOGY
3.1. Research Design 25
3.2. Population and Sample 25
3.3. Operational Definitions 27
3.4. Procedures 28
3.5. Data Analysis 29
3.6. Instruments 30
  3.6.1. Khalfa Hyperacusis Questionnaire (HQ) 30
  3.6.2. Brief Affective Reactivity Scale (BARS) 32
3.7. Methodology Limitations 34
CHAPTER 4 RESULTS AND DISCUSSION
4.1. Result Analysis 35
  4.1.1. Demographic Data 35
  4.1.2. Instrument Description 37
  4.1.3. Normality Tests 38
  4.1.4. Hypotheses Tests 39
  4.1.5. Analysis of Supplementary 39
4.2. Discussion 41
4.3. Limitations 52

CHAPTER 5 SUMMARY AND RECOMMENDATIONS
5.1. Summary 54
5.2. Recommendations 55
  5.2.1. Theoretical Recommendations 55
  5.2.2. Practical Recommendations 57

LIST OF APPENDIXES

Appendix A. Informed Consent for the Khalfa Hyperacusis Questionnaire
Appendix B. Informed Consent for Research and Data Collection
Appendix C. Brief Affective Reactivity Scale Blueprint
Appendix D. Questionnaire Blueprint
Appendix E. Krejcie and Morgan’s (1970) Sampling Table
Appendix F. Try Out Reliability and Validity of the Khalfa Hyperacusis Questionnaire
Appendix G. Try Out Reliability and Validity of the Brief Affective Reactivity Scale (Before Item Removal)
Appendix H. Try Out Reliability and Validity of the Brief Affective Reactivity Scale (After Item Removal)
Appendix I. Descriptive Statistics for Q4 and Q5
Appendix J. Reliability and Validity of the Khalfa Hyperacusis Questionnaire
Appendix K. Reliability and Validity of the Brief Affective Reactivity Scale (Before Item Removal)
Appendix L. Reliability and Validity of the Brief Affective Reactivity Scale (After Item Removal)
Appendix M. Normality Test and Hypotheses Tests with Spearman’s rho
Appendix N. Correlations Between Dimensions of the HQ and BARS Scores
Appendix O. Age Correlations with HQ and BARS Scores, Age and HQ Dimensions
Appendix P. Gender Differences in HQ and BARS Scores
Appendix Q. ANOVA Tests for Residence and HQ and BARS Scores
Appendix R. ANOVA Tests for Ward Placement with HQ and BARS Scores
Appendix S. Mann-Whitney U Tests for Q1, Q2, Q3 and HQ and BARS Score Differences
