

ACKNOWLEDGEMENTS

The author would like to express her special thanks of gratitude to God, Jesus Christ that has allowed the author to complete the thesis entitled “PRODUCTION OF KOMBUCHA FROM COFFEE ROBUSTA (*Coffea canephora*) LEAVES” at Universitas Pelita Harapan. God has helped the author to pass through the hurdles to complete the processes in the final project and through writing the thesis report at Universitas Pelita Harapan. Without God’s contributions, friends’ and supervisors’ support, both thesis program and report could not be completed. Therefore, the author would like to express sincere appreciation to:

1. Eric Jobiliong, Ph.D. as Dean of Faculty Science and Technology.
2. Sunie Rahardja, M.S.CE. acting Vice Dean of Faculty Science and Technology.
3. Laurence, ST., MT. as the Director of Faculty of Science and Technology.
4. Ir. W. Donald. R. Pokatong, M.Sc., Ph.D as the Head of Food Technology Study Program of UPH and head of examiners for the time spent and providing guidance with insightful comment to the thesis report.
5. Ratna Handayani, MP. as Vice Head of Food Technology Study Program UPH, for the support until thesis was completed.
6. Dr. -Ing Azis Boing Sitanggang, S. TP, MSc as the author’s thesis supervisor and examiner for the time and patience to guide the author during the analysis and writing the thesis at Universitas Pelita Harapan.
7. Wenny S. L. Sinaga S. TP, MSc. as the co- supervisor at Universitas Pelita

Harapan for giving the opportunity and trust to conduct thesis at Universitas Pelita Harapan.

8. Yuniwaty Halim, MSc. as examiner for constructive comments and insightful suggestions throughout the thesis completion.
9. Dr. Adolf J. N. Parhusip as the Head of Microbiology laboratory for helping the author to get acceptance to use the Microbiology laboratory as the main place of analyses at Universitas Pelita Harapan.
10. Yuniwaty Halim, MSc., Natania, M.Eng and Dr. Tagor M. Siregar, as Heads of Quality Control and, Food Processing and Chemistry Laboratories, respectively for the opportunity to conduct the research in the aforementioned laboratories.
11. Ms. Virly, Mr. Yosafat, Mr. Adi, Mr Aji, Mr. Darius, Mr. Christopher and Ms. Jessica as the laboratory supervisor for being friendly and helpful in guiding the author during the thesis program at Universitas Pelita Harapan.
12. All lectures of Food Technology Study Program who has taught the author during the study period at Universitas Pelita Harapan.
13. Beloved mother (Helen) and brother (Hizkia) for their support and endless love during the difficult times along the thesis period.
14. Eric Prasetya for the support, guidance, time and patience to guide the author during the analysis and writing the thesis.
15. Franz, Felicia, Brian, Antony, Willy and Gosun for their assistance and motivation as fellow thesis at Universitas Pelita Harapan.

16. Marissa, Katherine, Novini, Karina, Priscilla, Adriano, Mario, Jaron, Jhansen, Bara, Sonia, Gabriella and Ellen for their help and motivation given during the thesis program and to complete the thesis report.

The author is aware that the thesis report is still far from being perfect as inevitable mistakes were done during the thesis period at Universitas Pelita Harapan and during the completion of thesis report. Hence, there is still space for improvements to be made and criticisms and suggestions would gladly be accepted by the author. In the end, the author hopes that the report could be informative for the readers.

COVER	
STATEMENT OF THESIS AUTHENTICITY	
APPROVAL BY THESIS SUPERVISORS	
APPROVAL BY EXAMINATION COMITEE	
ABSTRACT	v
ACKNOWLEDGEMENTS	vi
LIST OF TABLES	xi
LIST OF FIGURES	xii
LIST OF APPENDICES	xiii
CHAPTER I INTRODUCTION	
1.1 Background	1
1.2 Research Problem	3
1.3 Objectives	4
1.3.1 General Objectives	4
1.3.2 Specific Objectives	4
CHAPTER II LITERATURE REVIEW	
2.1 Kombucha	5
2.2 Ingredient of Kombucha Prepared from Coffee Robusta (<i>Coffea canephora</i>) Leaves	5
2.2.1 Coffee Robusta (<i>Coffea canephora</i>) Leaf	5
2.2.2 Sugar	6
2.2.3 Kombucha Starter	6
2.2.3.1 Symbiotic Cultural of Bacteria and Yeast (SCOBY)	7
2.2.3.2 Liquid Starter	7
2.3 Factors Affecting the Quality of Kombucha Prepared from Coffee Robusta (<i>Coffea canephora</i>) Leaves	8
2.3.1 Fermentation Time	8
2.3.2 Tea Concentration	9
2.3.3 Types of Sugar	9
2.3.2.1 Sucrose	9
2.3.2.2 Glucose	9
2.3.2.3 Fructose	10
2.4 Changes in Kombucha prepared from Coffee Robusta Leaves	10
2.4.1 Antioxidant Activity	10
2.4.1.1 Total Phenolic Content	12
2.4.2 Acidity	12

2.4.3 Caffeine Content.....	12
CHAPTER III RESEARCH METHODOLOGY	
3.1 Materials and Equipment	14
3.2 Research Methods	15
3.2.1 Coffee Robusta (<i>Coffea canephora</i>) Leaf Tea	15
3.2.2 Kombucha Production.....	16
3.4 Method of Analysis.....	20
3.4.1 Lactic Acid Bacteria and Total Yeast Content.....	20
3.4.2 pH Value	21
3.4.3 Total Titratable Acidity.....	21
3.4.4 Caffeine Content	22
3.4.5 Antioxidant Activity	22
3.4.5.1 Free radical scavenging activity.....	22
3.4.5.2 IC ₅₀	23
3.4.6 Total Phenolic Content.....	23
3.4.7 Organoleptic Test, Hedonic Scales	23
3.4.8 Color Analysis.....	24
CHAPTER IV RESULTS AND DISCUSSION	
4.1 Yield of Dried <i>Coffea canephora</i> Leaf	25
4.2 Mother Tea Characteristic	25
4.3 Effect of Fermentation Conditions on Kombucha Parameters	27
4.3.1 Antioxidant Activity.....	27
4.3.2 Total Phenolic Content.....	29
4.3.3 Total Titratable Acidity	31
4.3.4 pH value	32
4.4 Correlation between Quality Parameters of Kombucha	34
4.5 Properties of Selected Kombucha.....	36
4.5.1 Organoleptic	39
4.5.2 Color Analysis	41
4.5.3.1 Hue	41
4.5.3.2 Lightness	42
4.5.4 Microbiological Analysis	42
CHAPTER V CONCLUSIONS AND SUGGESTIONS	
5.1 Conclusions.....	44
5.2 Suggestions	45
BIBLIOGRAPHY	45
APPENDICES	51

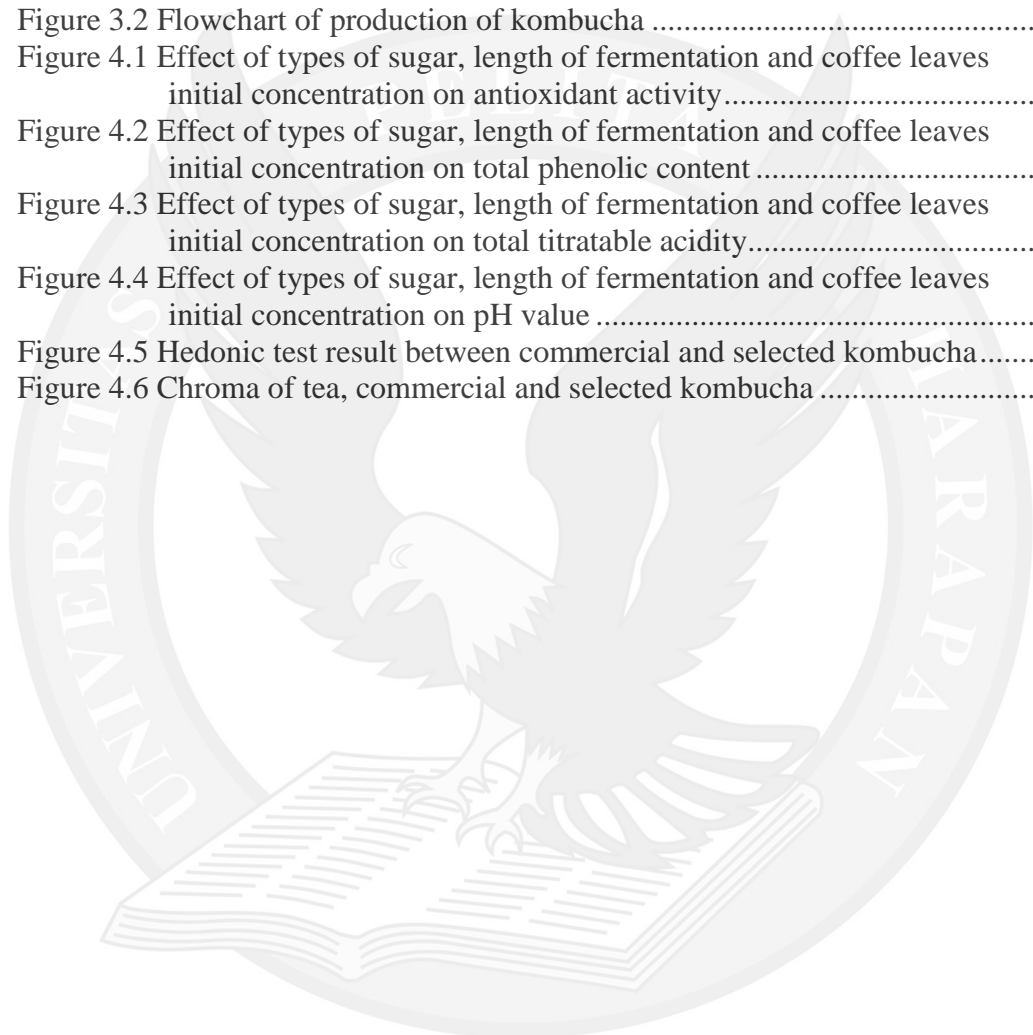

LIST OF TABLES

	page
Table 2.1 Antioxidant strength level based on DPPH method.....	11
Table 3.1 Experimental design of coffee Robusta kombucha production	18
Table 4.1 Yield of dried <i>Coffea canephora</i> leaf	25
Table 4.2 Mother tea profile.....	26
Table 4.3 Selected kombucha profile.....	37
Table 4.4 Microbiological content of mother tea and selected kombucha	42

LIST OF FIGURES

	page
Figure 2.1 Antioxidant mechanism	11
Figure 3.1 Flowchart of preparation of coffee Robusta leaf tea	15
Figure 3.2 Flowchart of production of kombucha	17
Figure 4.1 Effect of types of sugar, length of fermentation and coffee leaves initial concentration on antioxidant activity.....	28
Figure 4.2 Effect of types of sugar, length of fermentation and coffee leaves initial concentration on total phenolic content	30
Figure 4.3 Effect of types of sugar, length of fermentation and coffee leaves initial concentration on total titratable acidity.....	31
Figure 4.4 Effect of types of sugar, length of fermentation and coffee leaves initial concentration on pH value	33
Figure 4.5 Hedonic test result between commercial and selected kombucha.....	40
Figure 4.6 Chroma of tea, commercial and selected kombucha	41

LIST OF APPENDICES

	page
Appendix A	
Yield of dried <i>Coffea canephora</i> leaf	A-1
Appendix B	
Caffeine Content	B-1
Appendix C	
Free Radical Scavenging Activity	C-1
Appendix D	
Total Phenolic Content	D-1
Appendix E	
Total Titratable Acidity (Acetic Acid Content)	E-1
Appendix F	
pH Value	F-1
Appendix G	
Statistical Results of Total Phenolic Content at Different Fermentation Conditions	G-1
Appendix H	
Statistical Results of Free Radical Scavenging Activity at Different Fermentation Conditions	H-1
Appendix I	
Statistical Results of Acetic Acid at Different Fermentation Conditions	I-1
Appendix J	
Statistical Results of pH Value at Different Fermentation Conditions	J-1
Appendix K	
Statistical Correlations between Quality Parameters of Kombucha	K-1
Appendix L	
Mother Tea Profile	L-1

Appendix M
Properties of Selected KombuchaM-1

Appendix N
Organoleptic Test (Hedonic Test) N-1

Appendix O
Statistical Results of Hedonic Test..... O-1
