

ACKNOWLEDGEMENTS

Greatest thanks to God that had always accompanied the writer with His blessing in accomplishing this thesis entitled “STUDY OF PHYSICOCHEMICAL AND ANTIOXIDANT CHARACTERISTICS OF SOY YOGHURT MIXED WITH AFRICAN BITTER LEAF (*VERNONIA AMYGDALINA* DEL.) CRUDE EXTRACT” that is written as partial fulfilment of the academic requirements to obtain the degree of *Sarjana Teknologi Pertanian Strata Satu*, Universitas Pelita Harapan.

There are many supports, prayers, guidance, and help received for the writer. In this chance, writer would like to express gratitude and appreciation to those parties, including:

1. Eric Jobiliong, Ph.D. as Dean of Faculty of Science and Technology.
2. Sunie Rahardja, M.S.CE., as acting Vice Dean of Faculty of Science and Technology.
3. Laurence, M.T. as director of Faculty of Science and Technology.
4. Ir. W. Donald R. Pokatong, M.Sc., Ph.D. as Head of Food Technology Study Program and as thesis supervisor who had supervised, encouraged, and supported author through the whole process of this thesis.
5. Dr. Ir. Hardoko, MS. and Lucia C. Soedirga, M.Sc., as thesis examiners who gave advices for completion of the thesis.
6. Dr. Tagor M. Siregar, Dr. Adolf Parhusip, Dr. Nuri Arum Anugrahati, Yuniwaty Halim, M.Sc., as the Head of Chemistry, Microbiology, Food Processing, Quality Control, and Research Laboratory who had given permission to the writer to conduct the research in the laboratories.
7. Virly, STP., Jessica Decyree, STP., Darius, Yosafat, Adi and Adzie for the guidance and support during the research in laboratory
8. All lecturers of Food Technology Study Program of Universitas Pelita Harapan for the knowledge given, which was very useful during the research and thesis report completion.

9. All staff of Faculty of Science and Technology for the help and support.
10. Parents and family for endless support during the internship and the making of the report.
11. Bryan Anders, Ellen Tjakrakusuma, Malinda Houtama as partners under the same supervisor for the help and support during the thesis period.
12. Edison Sutiono, Reinald Febryanto Pengalila, Bryan Anders, Willy Williamdy, Nancy Chandyra, and Agustin Novita help and support during the thesis period.
13. All people, who have been contributed in the writing of this thesis that cannot be mentioned one by one.

The writer realizes that this report is far from perfect. Thus, any comments and suggestions are welcomed. The writer hopes that this thesis may provide useful and productive knowledge for people who read it.
