ACKNOWLEDGEMENTS

Praise and thanks be to Lord Jesus Christ for all the blessings that He has given from the start of this research until its completion. This thesis entitled "Credibility of Forwarded Messages Regarding Health Issues in WhatsApp Groups as Perceived by Millennial Users" is created to fulfill part of the academic requirements in obtaining the title of *Sarjana Ilmu Komunikasi Strata Satu* at Universitas Pelita Harapan, Tangerang.

The researcher knows that without the guidance, assistance and prayers of various parties, this thesis would not have been completed in time. Therefore, the researcher would like to extend her massive gratitude to everyone who has provided help in the process of writing this thesis, which includes the following people:

1) Prof. Aleksius Jemadu, Ph.D. as Dean of the Faculty of Social and Political Sciences,
2) Dr. Naniek N. Setijadi, S.Pd., M.Si., as the Associate Dean of the Faculty of Social and Political Sciences as well as the advising lecturer for the researcher who has given plenty of guidance and feedback for the researcher, pushed her to think further and work harder to get this research done, and encouraged her so much along the journey of writing this thesis,
3) Marsefio Sevyone Luhukay, S.Sos., M.Si. as the Head of Applied Communication Sciences Program and Coordinator of Final Projects who has given many directions in the process of finishing this project,

4) Agustin Diana Wardaningsih, S.E., M.I.Kom., as the lecturer who has helped the researcher at the beginning stages of writing this final project,
5) Kevin Christian, S.Ikom., as the Assistant Lecturer in Applied Communication Sciences Program who has provided assistance in the administration process involved in submitting this final project,
6) Dr. Benedictus A. Simangunsong, S.Ip., M.Si., who has provided massive help for the researcher, particularly in understanding the right methods needed for this research and helping the researcher solve problems relating to the methodology and execution along the way, as well as for the encouragement shared to the researcher to persevere with this project,
7) Rose Emmaria Tarigan, S.Sos., M.Si., the researcher's academic advisor who has provided encouragement and prayed for the researcher throughout her studies,
8) Sania Makki, S.Psi., M.BA., M.M., who made the researcher believe in herself at a time that she could not, for making the researcher dare to step out of that comfort zone and be bold enough to take risks, including with this research,
9) All lecturers in Faculty of Social and Political Science who has provided the researcher with knowledge that became building blocks for this research without the researcher realizing it over the years,
10) All respondents and participants of the research without whom this research will not have been possible,
11) Mama, Papa, and the researcher's sister Natasha for all the times they reminded the researcher that she could do it, for teaching the researcher to be

perseverant and resilient so that in times when there were obstacles to overcome in this study the researcher pushed on instead of giving up, for reminding the researcher to take care of her well-being throughout this process, for reminding the researcher to ask God to bless the process of this research, and for every life lesson that led the researcher to have enough mental strength to complete this study and to survive life,

12) Franciscabella and Julius Calvin, the researcher's best friends who have been at her side day in and day out for over a decade, including through the process of this research, for the massive amount of help in statistics tutorials and mental support when she had to face personal obstacles in my life while writing this,
13) The researcher's best friends and neighbors in university, Michelle Felicia, Virli Wei Syahar, Vanny Gosal for being the researcher's number one companions throughout her university days and women who can build empowering female friendships, for supporting the researcher throughout this process, for the care they have shown the researcher for which she can never be grateful enough,
14) Frederick Djunaidy for being there for the researcher every single day since 2012, for calling the researcher out when she is headed in the wrong direction, for constantly reminding the researcher of how strong and capable she is every single day, and for making the researcher a better version of herself,
15) The Salims in California – Uncle Tony, Auntie Irene, Michael – for constantly and ceaselessly praying for the researcher even from so far away,

16) The extended Ng family all over Indonesia who have continuously prayed for the researcher, wished her well and took care of her even though all of them have different faiths,
17) Sister Chrismerry, Sister Yoanessa, Sister Anita, Sister Dorothea, Sister Alfiana, and all the sisters of the Carolus Borromeus Order of Compassion who have prayed every single day for and with the researcher, who especially reminded the researcher to not be afraid to ask for help because "hands of angels will be there to give you the help you need,"
18) Della P.E. Samuel, Ericko Daniel, Christie Harris, Michele Alexander, Abby Masiglat, Nadya Perry, the researcher's creative buddies who pushed her to think bigger with every idea while at the same time appreciating what the researcher has done each step of the way,
19) Many other people and parties who have helped the researcher in many ways along the way and cannot be mentioned here one by one. Rest assured, the researcher is truly grateful for every one of them.

Finally, the researcher is aware that there are still plenty of weaknesses in this thesis. Thus, constructive criticism and suggestions from the readers are welcomed by the researcher. May this research be useful for anyone reading it and be a blessing to others.

Tangerang, November 2018

Mary Chelsea Salim

CHAPTER I INTRODUCTION 1
I.1 Background of the Problem..... 1
I.2 Problem Identification 6
I.3 Statement of the Problem 12
I.4 Purpose of the Study 12
I.5 Significance of the Study 12
I.6 Organization of the Study 13
CHAPTER II RESEARCH OBJECT AND SUBJECT 16
II.1 Research Object 16
II.2 Research Subject 25
CHAPTER III LITERATURE REVIEW 33
III.1 Communication 33
III.2 Communicating on the Internet 35
III.3 Message and Perception towards It 37
III.4 Elaboration Likelihood Model 39
III.5 Credibility of Messages in Computer-Mediated Communication 47
III.6 Media Literacy 49
III.7 Framework of the Study 52
CHAPTER IV RESEARCH METHOD 53
IV.1 Approach 53
IV.2 Method of Variable Operationalization 55
IV.2.1. Independent Variables 57
IV.2.2. Moderating Variable 62
IV.2.3. Dependent Variable 65
IV.2.4. Hypotheses of Relationships Between Variables .. 66
IV.3. Method of Quantitative Research 68
IV.3.1. Type of Research 68
IV.3.2. Method of Research 69
IV.4. Data Collection 73
IV.4.1. Collection of Primary Data 73
IV.4.2. Collection of Secondary Data 78
IV.5. Instrument Testing 78

IV.5.1. Validity Testing …… 80
IV.5.1.1. Validity Testing of Questionnaire Items Measuring Information Quality Variable .. 82
IV.5.1.2. Validity Testing of Questionnaire Items Measuring Persuasiveness of Simple Cues Variable …… 84
IV.5.1.3. Validity Testing of Questionnaire Items Measuring Media Literacy Variable ……. 86
IV.5.1.4. Validity Testing of Questionnaire Items Measuring Perceived Credibility of Forwarded Messages Regarding Health in WhatsApp Groups Variable …….. 89
IV.5.2. Reliability Testing …… 91
IV.5.2.1. Reliability Testing of Information Quality Variable …….. 91
IV.5.2.2. Reliability Testing of Persuasiveness of Simple Cues Variable ……. 92
IV.5.2.3. Reliability Testing of Media Literacy Variable …….. 93
IV.5.2.4. Reliability Testing of Perceived Credibility of Forwarded Messages Regarding Health in WhatsApp Groups Variable ……..... 94
IV.5.3. Changes to the Questionnaire After Validity and Reliability Testing ……... 95
IV.6. Data Analysis ……..... 98
CHAPTER V FINDINGS AND DISCUSSION
V.1. Research Findings ……..... 104
V.1.1. Profile of Respondents ……... 104
V.1.1.1. Age of Respondents …….. 104
V.1.1.2. Gender of Respondents ……. 105
V.1.1.3. Level of Education of Respondents …….. 106
V.1.1.4. Jobs of Respondents ……. 106
V.1.1.5.Types of WhatsApp Groups …….. 107
V.1.2. Variable of Media Literacy ……... 108
