

ACKNOWLEDGEMENTS

The author would like to give thanks to God for His guidance and blessing that have been given unto the author during preparation, research, and completion of this thesis report entitled “STUDY OF ANTIOXIDANT ACTIVITY OF CURCUMIN-BASED PYRANO[2,3-D]PYRIMIDINE AS MODIFIED CURCUMIN” that is written as partial fulfilment of the academic requirements to obtain the degree of *Sarjana Teknologi Pertanian Strata Satu* Food Technology, Universitas Pelita Harapan. The author realizes that this report would not be completed without the support, assistance, and guidance from others. Hence, the author would like to express the greatest gratitude to those who have given their supports and guidance, including:

- 1) Mr. Eric Jobiliong, Ph.D., as Dean of Faculty of Science and Technology.
- 2) Mrs. Sunie Rahardja, M.S.CE., as Acting Vice Dean of Faculty of Science and Technology.
- 3) Mr. Laurence, M.T., as Director of Faculty of Science and Technology.
- 4) Mr. Ir. W. Donald R. Pokatong, M.Sc., Ph.D., as Head of Food Technology Study Program, Faculty of Science and Technology, Universitas Pelita Harapan.
- 5) Mr. Ir. A. Herry Cahyana, Ph.D. as thesis supervisor for the abundant guidance, advice, and support during the research and completion of thesis report.
- 6) Mrs. Natania, M.Eng as thesis co-supervisor for the time and effort in guiding throughout the research and completion of thesis report.
- 7) Mr. Dr. Tagor M. Siregar, M.Si. as thesis defense examiner and the Head of Chemistry Laboratory where the author conducted the research and Mr. Dr. Adolf J.N. Parhusip, M.Si. as thesis defense examiner and the Head of Microbiology Laboratory for many useful advices in thesis completion.
- 8) Mrs. Nuri Arum Anugrahati, S.Si., M.P. as Academic Advisor for the support and academic advice during study period.
- 9) Ms. Yuniwaty Halim, M.Sc. as the Head of Quality Control Laboratory and Research Laboratory where the author conducted the research.

- 10) Mr. Darius, Ms. Virly, Mr. Andra, and Mr. Adi for the help and guidance in the laboratories during the research process.
- 11) All lecturers and staff of Food Technology Study Program for the help and information given during study period and thesis completion.
- 12) Beloved family including father, mother, and brother for their endless support and prayer during research process and completion of thesis report.
- 13) “Team Curcumin” Jeslyn Winata, Prabowo Saputra, Nerissa Arviana, Nancy Tamoni, and Livia as thesis partners who shared the good and hard times as well as gave support and help during thesis days.
- 14) Jeslyn Winata, Dea Lambertha, Felicia Wie, and Franz Fernando for the great support and caring.
- 15) Winnie Dorothy and Novia Tanasal for the advices and comfort during thesis completion.
- 16) All friends from Food Technology 2014 Universitas Pelita Harapan.
- 17) All friends and close relatives who are not yet mentioned but have supported the author during thesis completion.

The author is aware that this report is not perfect and the author might have done some faults during the research and completion of this report. The author would welcome any criticisms and suggestions given to this report with great pleasure. Finally, the author hopes that this report would be useful for the readers. Thank you.

COVER	
STATEMENT OF THESIS AUTHENTICITY	
APPROVAL BY THESIS SUPERVISORS	
APPROVAL BY THESIS EXAMINATION COMMITTEE	
ABSTRACT	v
ACKNOWLEDGEMENTS	vi
TABLE OF CONTENTS	viii
LIST OF FIGURES	x
LIST OF TABLES	xi
LIST OF APPENDICES	xii
CHAPTER I INTRODUCTION	
1.1 Back ground	1
1.2 Research Problem	2
1.3 Objectives.....	3
1.3.1 General Objective	3
1.3.2 Specific Objective	3
CHAPTER II LITERATURE REVIEW	
2.1 Curcumin	5
2.2 Cinnamaldehyde	8
2.3 Benzaldehyde	10
2.4 Barbituric Acid	11
2.5 Citric Acid	12
2.6 Dimedone	13
2.7 Modification of Curcumin	14
2.8 Antioxidant	15
2.9 Liquid Chromatography-Mass Spectrometry	17
2.10 UV-Vis Spectrophotometry	19
CHAPTER III RESEARCH METHODOLOGY	
3.1 Materials and Equipment	20
3.2 Research Method	20
3.2.1 Research Stage I	21
3.2.2 Research Stage II	23
3.3 Experimental Design	26
3.3.1 Research Stage I	26
3.3.2 Research Stage II	28

3.4 Method of Analysis	31
3.4.1 Percentage of Yield	31
3.4.2 Thin Layer Chromatography	31
3.4.3 Antioxidant Activity	32
3.4.4 Ultraviolet-Visible Spectrophotometry	32
3.4.5 Liquid Chromatography-Mass Spectrometry	33
CHAPTER IV RESULTS AND DISCUSSION	
4.1 Research Stage I	35
4.1.1 Effect of the Use of Solvent and Catalyst Concentration on Yield of Modified Curcumin	36
4.1.2 Effect of the Use of Solvent and Catalyst Concentration on TLC of Modified Curcumin	38
4.2 Research Stage II	39
4.2.1 Effect of Type of β -Diketone Compound and Type of Aldehyde on Yield of Modified Product	41
4.2.2 Effect of Type of β -Diketone Compound and Type of Aldehyde on TLC of Modified Product	42
4.2.3 Effect of Type of β -Diketone Compound and Type of Aldehyde on UV-Vis Characteristic of Modified Product	44
4.2.4 Effect of Type of β -Diketone Compound and Type of Aldehyde on Antioxidant Activity of Modified Product	47
4.2.5 Characterization of Modified Product Using Liquid Chromatography-Mass Spectrometry	51
CHAPTER V CONCLUSIONS AND SUGGESTIONS	
5.1 Conclusion	53
5.2 Suggestions	54
BIBLIOGRAPHY	55
APPENDICES	59

LIST OF FIGURES

LIST OF APPENDICES

	page
Appendix A. Data and Statistical Analysis of Yield of Modified Curcumin Treated with Different Use of Solvent and Catalyst Concentration	A-1
Appendix B. Thin Layer Chromatography Results of Benzaldehyde, Cinnamaldehyde, and Barbituric Acid	B-1
Appendix C. Thin Layer Chromatography Results of Modified Curcumin Treated with Different Use of Solvent and Catalyst Concentration	C-1
Appendix D. Data and Statistical Analysis of Yield of Modified Product Using Different Type of β -Diketone Compound and Type of Aldehyde.....	D-1
Appendix E. Thin Layer Chromatography Results of Modified Product Using Different Type of β -Diketone Compound and Type of Aldehyde.....	E-1
Appendix F. UV-Vis Spectrophotometry Analysis of Modified Product Using Different Type of β -Diketone Compound and Type of Aldehyde.....	F-1
Appendix G. Data and Statistical Analysis of Antioxidant Activity of Modified Product (Using Different Type of β -Diketone Compound and Type of Aldehyde) and Commercial Curcumin	G-1
Appendix H. Liquid Chromatography-Mass Spectrometry Analysis of Modified Product.....	H-1
