

ACKNOLEWDGEMENT

The foremost gratitude to the Lord, Jesus Christ for His infinite guidance and blessings provided to the author to complete this thesis, titled “DETERMINATION OF OPTIMUM CONDITIONS FOR PRODUCTION OF GLUCOSAMINE FROM SHRIMP SHELLS BY SOLID-STATE FERMENTATION USING *Trichoderma virens*”, punctually, starting from the making of the proposal, throughout the conduct of research, and up till the writing of the report.

This thesis was assembled based on the research conducted from July 2017 until November 2017, as partial fulfillment of the academic requirements to obtain the degree of *Sarjana Teknologi Pertanian Strata Satu* Food Technology, Universitas Pelita Harapan. The final project in the form of thesis is the final requirement for a college student is a compulsory, in accord to the curriculum of the Food Technology Study Program, Faculty of Science and Technology, Universitas Pelita Harapan. This thesis is also beneficial for the author to apply the author’s gained knowledge and to obtain new experience and knowledge outside of the lectures and courses.

The author acknowledges that the fulfillment of this thesis would not have been possible without the guidance and support from many parties. Henceforth, the author would like to show the author’s profound gratitude towards those who have unceasingly given their assistance and help, including:

1. Mr. Eric Jobiliong, Ph.D. as the Dean of the Faculty of Science and Technology.
2. Mr. Laurence, S.T., M.T., as the Director of the Faculty of Science and Technology.
3. Mr. Ir. W. Donald R. Pokatong, M.Sc., Ph.D., as the Head of the Food Technology Study Program who has helped
4. Ms. Yuniwaty Halim, M.Sc. as the author’s thesis supervisor, who has always patiently given guidance, counsel, direction, and enlightenment

starting from the making of the proposal up until the completion of this report.

5. Dr. Ir. Hardoko, MS. and Ms. Ratna Handayani, MP, as the lecturers of Food Technology Study Program who have given their counsel, guidance and insight regarding the research on glucosamine.
6. Beloved parents and relatives who have given their support and prayers to the author.
7. Dr. Adolf J. N. Parhusip as the head of the microbiology lab and head of examiners during the thesis defense, who has permitted the author to operate in the laboratory and given advice and suggestions.
8. Mrs. Natania, M.Eng as the head of the food processing lab, who has given the author permission to operate in the laboratory, help and advice.
9. Mr. Yosafat Rudju, Mr. Adi, Mr. Darius and Mr. Adzie as the laborants, and Mr. Mateus Andra Gunawan, STP. and Ms. Virly, STP. who have helped and supported the author in the laboratory.
10. Ms. Lucia C. Soedirga, M.Sc. as the member of the examination committee during the thesis defense who has given advice and suggestions to the author.
11. All lecturers and staffs from the Food Technology Program of Universitas Pelita Harapan who have helped the author in the making of this thesis.
12. “Glucosamine Family” Fabiola Wiratama, Kevin Samuel, Vania Lucida, Graziella Fausta, Cecillia Josephine, Veronica, Febrico Haris, Gracia Stefani Halim, and William Soegiarto who have helped, supported, enlightened, entertained and worked side by side the author throughout the research and completion of this thesis.
13. Marissa Arlianti, Irani Ratnasari, Sicilia Chandra Wijaya, Andrea Angelina, Natasya Angeline, Irene Agustini, Jessica Xaveria, Suhendro, Vamey Alvionita, Agustin Novita, Stephanny Zhang, Nancy Chandrya, Jessica Chan, Maria Monica, Jessica Chayadi, Kezia Luna, Novini Gunario, Karina Indriani, Angga Eka Sugato, Kenny Wijaya, Michelle,

Nathania Clairine, Jeslyn Winata, Florencia Irena and other friends who have supported and assisted the author in the lab.

14. Aditya Febrian, Angelina Widhiarta, Ginnya Priscilla, Angel Ng, Brigita Silvia, Theresa Ellen Tjakrakusuma, Ornella, Priska Sunka, Christine and other friends who have given support, comfort and prayers for the author.

15. All the other parties who have helped and supported the author and cannot be mentioned one by one.

The author realizes there are still many flaws and shortcomings in this report, therefore the author would gladly receive any critics and suggestions that may be useful for the improvement of this report. Finally, the author also hopes this report can be informative and useful for the readers, thank you.

Tangerang, January 2018

(Andrea Christy)

COVER	
STATEMENT OF THESIS AUTHENTICITY	
APPROVAL BY THESIS SUPERVISOR	
APPROVAL BY THESIS EXAMINATION COMMITTEE	
ABSTRACT.....	v
ACKNOWLEDGEMENT	vi
TABLE OF CONTENTS.....	ix
LIST OF FIGURES	xii
LIST OF TABLES	xiii
LIST OF APPENDICES	xiv
CHAPTER I INTRODUCTION	
1.1 Background	1
1.2 Research Problem	3
1.3 Objectives	4
1.3.1 General Objective	4
1.3.2 Specific Objectives	4
CHAPTER II LITERATURE REVIEW	
2.1 Tiger Shrimp	5
2.1.1 Morphology.....	6
2.1.2 Composition	8
2.2 Chitin.....	8
2.2.1 Isolation.....	10
2.2.2 Characterization	12
2.3 Glucosamine	12
2.4 N-acetylglucosamine.....	14
2.4.1 Production	14
2.4.2 Applications	15
2.5 Trichoderma virens	16
2.5.1 Morphology.....	17
2.5.2 Growth Conditions.....	18
2.5.3 Chitinase Production	19
2.6 Chitinolytic Enzymes	19
2.7 Solid-State Fermentation	21
CHAPTER III MATERIALS AND METHODS	
3.1 Materials and Equipment	23
3.2 Research Method	24
3.2.1 Preliminary Research	24
3.2.1.1 Preparation of Isolated Chitin	24
3.2.1.2 Preparation of Physiological Saline Solution	26
3.2.1.3 Preparation of Stock Culture.....	26

3.2.1.4 Preparation of Working Culture.....	26
3.2.1.5 Preparation of Starter Culture	26
3.2.1.6 Preparation of Slide Culture.....	27
3.2.1.7 Morphological Characterization of Culture	27
3.2.1.8 Preparation of Colloidal Chitin.....	28
3.2.1.9 Chitinolytic Activity Assay.....	28
3.2.1.10 Spore Count	29
3.2.2 Main Research	29
3.2.2.1 First Stage Research.....	30
3.2.2.2 Second Stage Research	31
3.3 Experimental Design.....	32
3.3.1 First Stage Research.....	32
3.3.2 Second Stage Research	33
3.4 Method of Analysis.....	35
3.4.1 Shrimp Powder Analysis.....	35
3.4.1.1 Moisture Content (AOAC, 2005)	35
3.4.1.2 Ash Content (AOAC, 2005)	35
3.4.1.3 Protein Content (Nielsen, 2009 with modifications)	36
3.4.2 Isolated Chitin Analysis	36
3.4.2.1 Yield Analysis (Dompeipen, <i>et al.</i> , 2016)	37
3.4.2.2 Degree of Acetylation (Czechowska-Biskup, <i>et al.</i> , 2012)	37
3.4.3 Clear Zone Analysis (Suryadi, <i>et al.</i> , 2013 with modification).....	38
3.4.4 N-acetylglucosamine Analysis.....	38
3.4.4.1 N-acetylglucosamine Sample Extraction (Ulfa, 2016 with modifications).....	38
3.4.4.2 Preparation of N-acetylglucosamine Standard Curve (Ulfa, 2016 with modifications)	38
3.4.4.3 Quantification of N-acetylglucosamine (Ulfa, 2016 with modifications).....	39

CHAPTER IV RESULTS AND DISCUSSIONS

4.1 Preliminary Research	40
4.1.1 Shrimp Identification and Shell Powder Analysis	40
4.1.2 Analysis of Isolated Chitin.....	41
4.1.3 Characterization of <i>Trichoderma virens</i>	45
4.1.3.1 Morphology.....	45
4.1.3.2 Chitinolytic Activity	46
4.1.3.3 Spore Count	48
4.2 Main Research	48
4.2.1 First Stage Research.....	48
4.2.2 Second Stage Research	50

CHAPTER V CONCLUSIONS AND SUGGESTIONS	
5.1 Conclusions.....	54
5.2 Suggestions	55
BIBLIOGRAPHY.....	56
APPENDICES	63

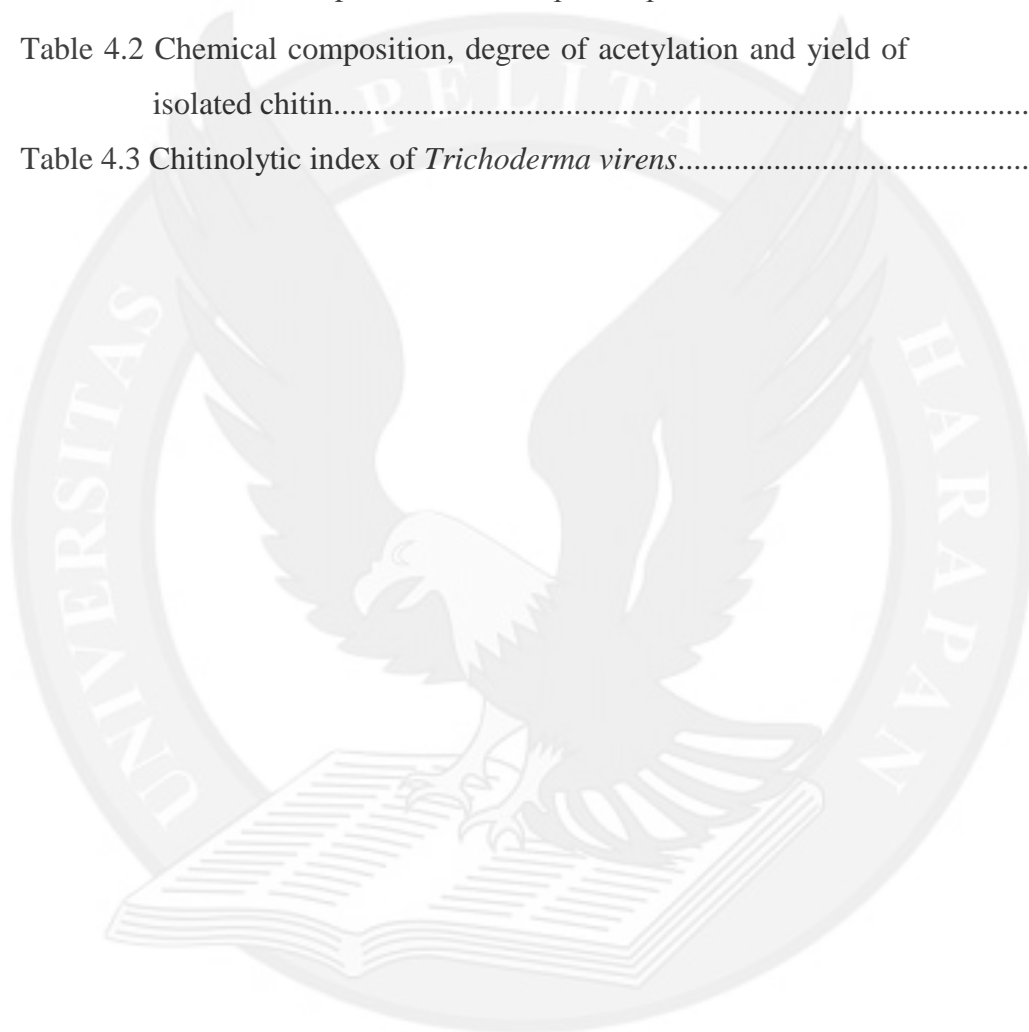

LIST OF FIGURES

LIST OF APPENDICES

	page
Appendix A	
Moisture Addition for Fermentation Media.....	A-1
Appendix B	
Shrimp Identification	B-1
Appendix C	
Moisture Content	C-1
Appendix D	
Ash Content	D-1
Appendix E	
Protein Content	E-1
Appendix F	
Degree of Acetlation of Chitin.....	F-1
Appendix G	
Yield.....	G-1
Appendix H	
<i>Trichoderma virens</i> Culture and Morphology	H-1
<i>T. virens</i> Culture Purchased from Research Center of Biology (LIPI).....	H-1
Photographs of <i>Trichoderma virens</i> Culture (Rejuvenation).....	H-1
Microscopic Observation of <i>T. virens</i>	H-2
Appendix I	
Chitinolytic Index of <i>Trichoderma virens</i>	I-1
Appendix J	
Spore Count by Hemocytometer.....	J-1
Appendix K	
N-acetylglucosamine Standard Curve.....	K-1
Appendix L	
First Stage Research – N-acetylglucosamine Quantification.....	L-1
Statistical Results of NAG Concentration Produced by Fermentation at Varying Temperatures (One-Way ANOVA).....	L-1

Post-Hoc Test of NAG Concentration Produced by Fermentation at Varying Temperature.....	L-2
--	-----

Appendix M

Second Stage Research – N-acetylglucosamine Quantification	M-1
Statistical Results of NAG Concentration Produced by Fermentation at Varying pH and Fermentation Time.....	M-3
Post-Hoc Test on the Effect of pH and Fermentation Time on NAG Production	M-5

Appendix N

Photos of Process during Research	N-1
Chitin Preparation	N-1
Colloidal Chitin Preparation	N-2
Main Research (Fermentation).....	N-3
