**TITLE : PEMBANGUNAN WEBSITE PENJUALAN HARDWARE DI CV. DR.  
KOMPUTER**

The process of promoting the product and to cover a larger market for CV. DR. Komputer requires a new system that will allow the customer to get complete information on the products and make a direct online transaction through internet. This need is due to the system's ineffectiveness, where the customers make many complain to CV. DR. Komputer if they didn't find their product when they already came to CV. DR. Komputer. Thus, the new system proposed to CV. DR. Komputer is by developing website that, in the future, will be able to cover a large market with an easy maintenance.

The website is developed using the MYSQL, PHP, Macromedia Dreamweaver MX and Apache web server. In this report, writer will discuss specifically about web programming technique by using PHP and a bit HTML for the page display.
