

## ACKNOWLEDGEMENTS

To start it off, the upmost gratitude and highest praise to Jesus Christ for His constant grace and blessings have enabled the author to complete this thesis with a title “EFFECT OF RATIO OF PURIFIED *ILES-ILES* FLOUR TO JACKFRUITSEED FLOUR AND PUMPKIN PUREE AS FAT REPLACER ON PHYSICOCHEMICAL AND ORGANOLEPTIC PROPERTIES OF COOKIES.”

This thesis was written based on data retrieved from research conducted from August 2020 to November 2020 and was written as the partial fulfillment of the academic requirement to obtain the degree of *Sarjana Teknologi Pertanian*, Food Technology Study Program, Faculty of Science and Technology, Universitas Pelita Harapan, Tangerang.

The author has received much help in the form of prayer, guidance and encouragement from many different parties. The help received by the author has enabled the author to complete this thesis. Thus, the author would like to express his upmost gratitude to the following parties:

1. Ir. W. Donald R. Pokatong, M.Sc., Ph.D., Head of Food Technology Study Program, as thesis supervisor who had given guidance, supervision, helpful advices, constructive suggestions and criticism from the preparation of the thesis proposal up to the completion of the thesis itself.
2. Eric Jobiliong, Ph.D. as Dean of Faculty of Science and Technology, Universitas Pelita Harapan. Whom had helped the author with various paperwork throughout the academic years.
3. Dr. Nuri Arum Anugrahati, as Vice Dean of Faculty of Science and Technology, Universitas Pelita Harapan. Whom had helped the author with various paperwork throughout the academic year.
4. Laurence, S.T., M.T. as Director of Finance and Student Affair of Faculty of Science and Technology, Universitas Pelita Harapan. Whom had helped the author with various paperwork throughout the academic years.

5. Ratna Handayani, M.P. as Deputy Head of Food Technology Study Program for the information given throughout the thesis project period.
6. Yuniwaty Halim, M.Sc. as the Head of Quality Control and Research Laboratory and Dr. Tagor M. Siregar, M.Si. as the Head of Chemistry Laboratory.
7. Natania, M.Eng. as the Head of Food Processing Laboratory where the author was mostly working at.
8. Intan Cidarbulan Matita, Ph.D. as the authors academic supervisor, whom has given guidance and aid to the author throughout the past 3 academic years
9. Aileen, S.T.P., Regy Tahapary, Darius, Pak Aji and Adhi for guiding and teaching the author in utilizing certain equipment in the laboratory.
10. All other lecturers, assistant and staffs of Food Technology Study Program for the help during the thesis project period.
11. Beloved parents, Purnamasari Tanudjaja and Hadi Sujono Ibrahim, for the constant love, support, encouragement, prayers and time that they have given to the author during the thesis period.
12. Michael Djurijanto, Gobinder Singh, Jessica Jocelyn, Oe Ming Ay, Stevany Natanael, Febiana Christy as friends under the same supervisor.
13. Michael Austin, Michael Adrian, Christopher Setiawan, Christopher Jason, Jason Muliadi, Yesyurin Kirana, Mona Felicia, Joanne Tirto, Calmness Fellia Halim and Charlene Octavian Anggono for accompanying the author throughout the thesis period.
14. All friends and relatives who had not been mentioned whom also took part in supporting and encouraging the author during the thesis period.

The author realized that this report is far from perfect and in need of improvements. The author apologizes for any imperfections that are in this report. Any sort of criticism and suggestions for the improvement of this report is very much welcomed. The author hopes that this report can be of use for many parties.

Tangerang, January 2021
