

ACKNOWLEDGEMENTS

Praise the Lord Jesus Christ for His abundant blessing and guidance upon the author throughout the research and thesis report “EFFECT OF PARTIAL SUBSTITUTION WITH HEAT-MOISTURE TREATED SWEET POTATO (*IPOMOEA BATATAS* L.) FLOUR ON PHYSICOCHEMICAL AND ORGANOLEPTIC CHARACTERISTICS OF PAN BREAD” completion. This thesis report was done as the last requirement to obtain the degree of *Sarjana Teknologi Pertanian* in the Food Technology Study Program of Universitas Pelita Harapan.

The thesis would not be completed without the support, guidance, and assistance from others. Hence, the author would like to extend the greatest gratitude to those who have given their supports and guidance, including:

1. Ir. W. Donald R. Pokatong, M.Sc., Ph.D. Head of Food Technology Study Program, as Thesis Supervisor, for the chance given to the author to conduct the research and for the guidance, feedback, and suggestions throughout the research and thesis report completion.
2. Eric Jobilong, Ph.D. as the Dean of Faculty of Science and Technology, Universitas Pelita Harapan.
3. Dr. Nuri Arum Anugrahati, S.Si., MP. as the Vice Dean of Faculty of Science and Technology, Universitas Pelita Harapan.
4. Ratna Handayani, S.TP., M.P. as the Vice Head of Food Technology Study Program for the informations and guidance given throughout the thesis completion.
5. Dr. Tagor M. Siregar, S.Si., M.Si. as thesis examiner, for constructive advices and suggestions for the thesis.
6. Yuniwaty Halim, M.Sc. as the Head of Quality Control and Research Laboratories and thesis examiner, for the permissions given to the author to conduct the research and for constructive advices and suggestions for the thesis.
7. Natania, M.Eng. as the Head of Food Processing Laboratory, for the permissions given for the author to conduct the research.

8. Ms. Aileen, Mr. Regy, Mr. Aji, and Mr. Adi for the help and guidance in the laboratories given to the author.
9. All lecturers and staffs of Food Technology Department for the help and information given to the author throughout the thesis completion.
10. Beloved family including father (Harianto Soebroto), mother (Lina Simon), and brother (Kevin Christian) for their care and support during the research and throughout the thesis completion.
11. Alvin Wilson for the help, motivation, and support during the research and throughout the thesis completion.
12. Irene Natasha and Ida Ayu Komang Chandra Devi for the help, support, and comfort during the research and thesis completion.
13. Michael, Steven, Gobinder, Ming Ay, Stevany, and Jessica as thesis partners for the help and support during the research and thesis completion.
14. All members of Food Technology 2017 who had also conducted the thesis together with the author, for the help and informations given regarding the research and thesis completion.
15. All family, friends, and colleagues who are not listed one by one, but have contributed to the completion of this thesis report.

The author realizes that this thesis report is far from perfect and still need much improvement. Therefore, any suggestion and criticism to improve this report are gladly welcomed. At last, the author hope this report may be useful and informative for the readers. Thank you.

3.5.5 Carbohydrate Content (AOAC, 2005).....	27
CHAPTER IV RESULTS AND DISCUSSION	
4.1 Taxonomical Verification of Sweet Potato	28
4.2 Effect of HMT Temperature and Time on Physicochemical Characteristics of Sweet Potato Flour	28
4.2.1 Swelling Power of Modified Sweet Potato Flour	28
4.2.2 Solubility of Modified Sweet Potato Flour.....	30
4.2.3 Lightness of Modified Sweet Potato Flour	31
4.2.4 Selected Modified Sweet Potato Flour Based on Swelling Power	32
4.2.5 Chemical Composition of Selected Modified Sweet Potato Flour	33
4.3 Effect of Wheat Flour to Selected Modified Sweet Potato Flour Ratio on Physical and Organoleptic Characteristics of Pan Bread	35
4.3.1 Weight	35
4.3.2 Volume	36
4.3.3 Hardness	38
4.3.4 Crust Lightness.....	39
