ACKNOWLEDGEMENTS

Praise God the almighty for His blessing and guidance that had been given unto the author during preparation, research, and completion of this thesis report entitled “EFFECT OF CARBOXYMETHYL CELLULOSE (CMC) AND EGG CONCENTRATION ON NOODLE ANALOGUE CHARACTERISTICS”.

This thesis report is written based on the research that was conducted from August 2020 to December 2020. This thesis report is written as partial fulfillment of the academic requirements to obtain the degree of *Sarjana Teknologi Pertanian* Food Technology Study Program at Pelita Harapan University. This thesis report is also useful for the author to apply the knowledge that has been gained and to obtain new experiences.

This thesis report would not be completed without the support, assistance, prayers, and guidance from many parties during laboratory experiment and completion of this report. Therefore, the author would like to express the greatest gratitude to those parties, whether directly or indirectly, including:

1. Eric Jobiliong, Ph.D., as the Dean of Faculty of Science and Technology, Universitas Pelita Harapan.
2. Dr. Nuri Arum Anugrahati, S.Si., MP., as the Vice Dean of Faculty of Science and Technology, Universitas Pelita Harapan.
3. Laurence, S.T., M.T., as the Director of Faculty Administration and Student Affairs, Universitas Pelita Harapan.
4. Ir. Wilbur Donald Raymond Pokatong, Ph.D., as the Head of Food Technology Department, Faculty of Science and Technology, Universitas Pelita Harapan.
5. Ratna Handayani, MP., as the Deputy Head of Food Technology Department, Faculty of Science and Technology, Universitas Pelita Harapan.
6. Yuniwaty Halim, M.Sc., as the author’s Thesis Supervisor and as the Head of Quality Control Laboratory for the time, guidance, support throughout the thesis program and completion of the report, and for the chance that has been given to author to conduct the thesis research in the laboratory.

7. Natania, M.Eng., as the Head of Food Processing Technology Laboratory for the chance that has been given to author to conduct the thesis research in the laboratory.
8. Mr. Paoji, Mr. Adih, Mr. Regy, and Mr. Darius as the laboratory assistant who have given many helps to the author during the thesis research.
9. All of the lecturers and staffs of Food Technology Department who have helped and given many knowledges to the author during the thesis research.
10. Parents, Ida Bagus Komang Ardika and Merry Liong, as well as sister and brother, Ida Ayu Putu Liangga Dewi and Ida Bagus Made Arya Permana, as the beloved family of the author for the support, time, prayers, and criticisms during the thesis program.
11. Danang Aji Prasetyo, Firena Setyanti Merrylinda Simanjuntak, Nindita Pratama, Salsabila Dhia Karendrarswari, Muhammad Rifky Fajriansyah, Diandra Tirta Kusuma, Irene Natasha, and Febiana Christy as best friends of author who gave endless supports, motivations, time, prayers, and consolations for the author during the lecture period, thesis research, and completion of this report.
12. Clara Tasia, Madeleine Gracia, and Laurensia Leonnie as seniors of the author who have given supports, information, and motivation during lecture period, thesis program, and completion of this report.
13. 2017 C friends who have given supports, information, prayers, and motivation during lecture period.
14. 2017 A and B friends who have given supports and helps during lecture period and thesis program.
15. All friends and relatives who had not been mentioned but also took part in supporting the author during completion of thesis program and report.

The author is aware that this report is not perfect, and the author apologizes if the author might have done some faults during the thesis program and completion of this report. The author would gladly accept any criticisms and suggestions given

to this report. Finally, the author hopes that this report would be useful for the readers. Thank you.

CHAPTER I INTRODUCTION 1
1.1 Background 1
1.2 Research Problem 4
1.3 Objectives 4
1.3.1 General Objectives 4
1.3.2 Specific Objectives 5

CHAPTER II LITERATURE REVIEW 6
2.1 Rice 6
2.2 Rice Flour 6
2.3 Emulsifier 8
2.3.1 Carboxymethyl Cellulose 8
2.3.2 Lecithin 9
2.4 Egg 10
2.5 Noodle 11
2.5.1 Noodle Analogue 13
2.6 Starch 13

CHAPTER III RESEARCH METHODOLOGY 15
3.1 Materials and Equipment 15
3.2 Research Methodology 16
3.2.1 Research Stage I 16
3.2.1.1 Research Procedures 16
3.2.1.1.1 Production of Noodle Analogue Stage I 16
3.2.1.2 Analysis parameters 18
3.2.1.3 Experimental Design 18
3.2.2 Research Stage II 20
3.2.2.1 Research Procedures 20
3.2.2.2 Analysis Parameters 20
3.2.2.3 Experimental Design 21
3.3 Analytical Procedures 22
3.3.1 Cooking Loss (Tan *et al*., 2009) 22

3.3.2 Water Absorption (Kraithong *et al*., 2019) 22
3.3.3 Texture Analysis (Putra, 2008) 23
3.3.6 Tensile Strength and Elongation (Sun *et al*., 2019; Nouri *et al*., 2015) 23
3.3.5 Sensory Test (Tarwendah, 2017) 24
3.3.5.1 Hedonic Test 24
3.3.5.2 Paired Comparison Test 24
3.3.6 Proximate Analyses 25
3.3.6.1 Moisture Content (AOAC, 2005) 25
3.3.6.2 Protein Content (AOAC, 2005) 25
3.3.6.3 Total Fat Content (AOAC, 2005) 26
3.3.6.4 Ash Content (AOAC, 2005) 27
3.3.6.5 Total Carbohydrate Content (AOAC, 2005) 27

CHAPTER IV RESULTS AND DISCUSSIONS 28
4.1 Characteristics of Noodle Analogue with Variation of CMC and Egg Concentration 28
4.1.1 Cooking Loss 28
4.1.2 Water Absorption 30
4.1.3 Hardness 32
4.1.4 Adhesiveness 33
4.1.5 Springiness 34
4.1.6 Cohesiveness 36
4.1.7 Tensile Strength 38
4.1.8 Elongation 39
4.1.9 Hedonic Test 41
4.1.9.1 Taste 41
4.1.9.2 Aroma 42
4.1.9.3 Chewiness 43
4.1.9.4 Hardness 44
4.1.9.5 Adhesiveness 45
4.1.9.6 Overall Acceptance 45
4.1.10 Determination of the Best Concentration of CMC and Egg on Noodle Analogue Characteristics 46
4.2 Comparison of Best Formulation Noodle Analogue and Commercial Wheat-based Noodle 47
4.2.1 Proximate Analyses 47
4.2.2 Cooking Loss and Water Absorption 50
4.2.3 Texture 51
4.2.4 Paired Comparison Test 53

CHAPTER V CONCLUSIONS AND SUGGESTIONS 56
5.1 Conclusions 56
5.2 Suggestions 57

LIST OF APPENDICES

page

Appendix A.
Moisture Content of Noodle Analogue with Variation of CMC and Egg Concentration A-1

Appendix B.
Cooking Loss of Noodle Analogue with Variation of CMC and Egg Concentration B-1
Post Hoc Duncan Statistics Results of Cooking Loss of Noodle analogue with Variation of CMC and Egg Concentration.....B-4

Appendix C.
Water Absorption of Noodle Analogue with Variation of CMC and Egg Concentration C-1
Post Hoc Duncan Statistics Results of Water Absorption of Noodle analogue with Variation of CMC and Egg Concentration C-4

Appendix D.
Hardness of Noodle Analogue with Variation of CMC and Egg Concentration D-1
Post Hoc Duncan Statistics Results of Hardness of Noodle analogue with Variation of CMC and Egg Concentration.....D-3

Appendix E.
Adhesiveness of Noodle Analogue with Variation of CMC and Egg Concentration E-1
Post Hoc Duncan Statistics Results of Adhesiveness of Noodle analogue with Variation of CMC and Egg Concentration.....E-3

Appendix F.
Springiness of Noodle Analogue with Variation of CMC and Egg Concentration F-1
Post Hoc Duncan Statistics Results of Hardness of Noodle analogue with Variation of CMC and Egg Concentration.....F-2

Appendix G.
Cohesiveness of Noodle Analogue with Variation of CMC and Egg Concentration G-1
Post Hoc Duncan Statistics Results of Cohesiveness of Noodle analogue with Variation of CMC and Egg Concentration.....G-3

Appendix H.
Tensile Strength of Noodle Analogue with Variation of CMC and Egg Concentration H-1

Post Hoc Duncan Statistics Results of Tensile Strength of Noodle analogue with Variation of CMC and Egg Concentration H-3

Appendix I.
Elongation of Noodle Analogue with Variation of CMC and Egg Concentration I-1
Post Hoc Duncan Statistics Results of Elongation of Noodle analogue with Variation of CMC and Egg Concentration.....I-3

Appendix J.
Statistical Analysis of Hedonic Test of Taste of Noodle Analogue with Variation of CMC and Egg Concentration.....J-1
Post Hoc Duncan Statistics Results of Taste of Noodle analogue with Variation of CMC and Egg Concentration.....J-1

Appendix K.
Statistical Analysis of Hedonic Test of Aroma of Noodle Analogue with Variation of CMC and Egg Concentration.....K-1

Appendix L.
Statistical Analysis of Hedonic Test of Chewiness of Noodle Analogue with Variation of CMC and Egg Concentration.....L-1
Post Hoc Duncan Statistics Results of Chewiness of Noodle analogue with Variation of CMC and Egg Concentration.....L-1

Appendix M.
Statistical Analysis of Hedonic Test of Hardness of Noodle Analogue with Variation of CMC and Egg Concentration.....M-1
Post Hoc Duncan Statistics Results of Hardness of Noodle analogue with Variation of CMC and Egg Concentration.....M-1

Appendix N.
Statistical Analysis of Hedonic Test of Adhesiveness of Noodle Analogue with Variation of CMC and Egg Concentration.....N-1

Appendix O.
Statistical Analysis of Hedonic Test of Overall Acceptance of Noodle Analogue with Variation of CMC and Egg Concentration O-1
Post Hoc Duncan Statistics Results of Overall Acceptance of Noodle analogue with Variation of CMC and Egg Concentration O-1

Appendix P.
Moisture Content of Best Formulation Noodle Analogue and Commercial Wheat-based Noodle P-1

Independent Samples Test Result of Moisture Content of Best Formulation Noodle Analogue and Commercial Wheat-based Noodle P-1

Appendix Q.
Protein Content of Best Formulation Noodle Analogue and Commercial Wheat-based Noodle Q-1
Independent Samples Test Result of Protein Content of Best Formulation Noodle Analogue and Commercial Wheat-based Noodle....Q-2

Appendix R.
Total Fat Content of Best Formulation Noodle Analogue and Commercial Wheat-based Noodle R-1
Independent Samples Test Result of Total Fat Content of Best Formulation Noodle Analogue and Commercial Wheat-based Noodle....R-2

Appendix S.
Ash Content of Best Formulation Noodle Analogue and Commercial Wheat-based Noodle S-1
Independent Samples Test Result of Ash Content of Best Formulation Noodle Analogue and Commercial Wheat-based Noodle....S-2

Appendix T.
Total Carbohydrate Content of Best Formulation Noodle Analogue and Commercial Wheat-based Noodle.....T-1
Independent Samples Test Result of Total Carbohydrate Content of Best Formulation Noodle Analogue and Commercial Wheat-based Noodle....T-2

Appendix U.
Cooking Loss of Best Formulation Noodle Analogue and Commercial Wheat-based Noodle U-1
Independent Samples Test Result of Cooking Loss of Best Formulation Noodle Analogue and Commercial Wheat-based Noodle....U-1

Appendix V.
Water Absorption of Best Formulation Noodle Analogue and Commercial Wheat-based Noodle V-1
Independent Samples Test Result of Water Absorption of Best Formulation Noodle Analogue and Commercial Wheat-based Noodle....V-1

Appendix W.
Hardness of Best Formulation Noodle Analogue and Commercial Wheat-based Noodle W-1
Independent Samples Test Result of Hardness of Best Formulation Noodle Analogue and Commercial Wheat-based Noodle W-1

Appendix X.
Adhesiveness of Best Formulation Noodle Analogue and Commercial Wheat-based Noodle X-1
Independent Samples Test Result of Adhesiveness of Best Formulation Noodle Analogue and Commercial Wheat-based Noodle X-1

Appendix Y.
Springiness of Best Formulation Noodle Analogue and Commercial Wheat-based Noodle Y-1
Independent Samples Test Result of Springiness of Best Formulation Noodle Analogue and Commercial Wheat-based Noodle Y-1

Appendix Z.
Cohesiveness of Best Formulation Noodle Analogue and Commercial Wheat-based Noodle Z-1
Independent Samples Test Result of Cohesiveness of Best Formulation Noodle Analogue and Commercial Wheat-based Noodle Z-1

Appendix AA.
Tensile Strength of Best Formulation Noodle Analogue and Commercial Wheat-based Noodle AA-1
Independent Samples Test Result of Tensile Strength of Best Formulation Noodle Analogue and Commercial Wheat-based Noodle AA-1

Appendix AB.
Elongation of Best Formulation Noodle Analogue and Commercial Wheat-based Noodle AB-1
Independent Samples Test Result of Elongation of Best Formulation Noodle Analogue and Commercial Wheat-based Noodle AB-1

Appendix AC.
Data from Paired Comparison Test of Best Formulation Noodle Analogue and Commercial Wheat-based Noodle AC-1
One-Sample Test Result of Paired Comparison Test of Best Formulation Noodle Analogue and Commercial Wheat-based Noodle AC-1

Appendix AD.
Hedonic Test Questionnaire AD-1

Appendix AE.
Paired Comparison Test Questionnaire AE-1

Appendix AF.
Certificate of Analysis of Noodle Analogue' Emulsifier.....AF-1

Appendix AG.
Production Process of Noodle Analogue.....AG-1
