

ACKNOWLEDGEMENTS

The foremost gratitude is to Lord Jesus Christ for His blessings and guidance given to the author in completing this thesis entitled “STUDY ON THE ACTIVE EDIBLE FILM MADE OF SAGO FLOUR AND BLACK CUMIN POWDER WITH GLYCEROL PLASTICIZER”.

This thesis was written as the partial fulfillment of the academic requirement to obtain the degree of *Sarjana Teknologi Pertanian Strata Satu*, Food Technology Study Program, Faculty of Science and Technology, Universitas Pelita Harapan, Tangerang. This thesis is also useful to apply the knowledge that have been received and as a new experience that is not able to be obtained during the study at the university.

The author realizes that this thesis would not be possible to be completed well and in time without the guidance, assistance, prayers and supports from various parties involved. Thereby, the author would like to take this opportunity to express her gratitude towards those who have helped and given support during the completion of this final project, including:

1. Eric Jobiliong, Ph.D., Dean of Faculty of Science and Technology for the guidance and helpful inputs during study in Universitas Pelita Harapan.
2. Laurence, MT., Director of Faculty of Science and Technology for the inspiring words and support during study in Universitas Pelita Harapan.
3. Sunie Rahardja, M.S.CE. as acting vice Dean of Faculty of Science and Technology.
4. Ir. W. Donald R. Pokatong, M.Sc., Ph.D., Head of Food Technology Study

Program, guided, supported, given useful inputs during study in Universitas Pelita Harapan.

5. Ratna Handayani, MP, Deputy Head of Food Technology Study Program who has guided the author to perform the thesis project.
6. Dr. Ir. Raffi Parmawati, M.Si., as thesis supervisor for the guidance, patience, support, encouragement, knowledge, and time given from the beginning of the thesis proposal preparation till the completion of the thesis.
7. Intan Cidarbulan Matita, Ph.D, as thesis co-supervisor for the guidance, support, and knowledge throughout the thesis project.
8. Wenny S.L. Br. Sinaga M.Si., as academic supervisor for the useful knowledge and support during study in Universitas Pelita Haraoan.
9. Yuniwaty Halim, M.Sc., Natania, M.Eng., and Dr. Tagor M. Siregar, Heads of Quality Control, Research, Food Processing, and Chemistry Laboratories, respectively.
10. All lecturers of Food Technology Department who teach the author during studying at Universitas Pelita Harapan.
10. Ms. Virly, Mr. Andra, Mr. Aji, Mr. Adi and Mr. Darius for the help and information during the work in the laboratories.
11. Julia Ratna Wijaya, M.AppSc. and Sisi P.L.A Gultom, M.Eng., former head and deputy head of Food Technology Study Program for the knowledge and support to conduct the thesis project till the end.
12. All others lecturers, lecturers assistant, and staffs in Food Technology Study Program for the support and help given to the author during the project.

13. Beloved parents, Delip Kumar Vaswani and Sati Lachmandas Shewakramani, and dearest sister, Khusbu Vaswani, for the endless love, support, encouragement and prayers given to the author during the thesis completion.
14. Marissa and my other classmates for the kindness, love, joy, laughter, support and help throughout my study in Universitas Pelita Harapan.
15. Marcella, Vanessa, Natasha, Nathania, and Priska for the kindness, care, and support throughout the making of my thesis.
16. Joshua and Radhika for the love, help, support, encouragement, entertainment, laughter and joy during years of study in Universitas Pelita Harapan.

The author is aware that this report is far from perfection and might have done some mistakes either during the research process or the completion of the thesis report. Therefore, the author would appreciate any type of criticisms and suggestions given regarding this report. Furthermore, the author hopes that this thesis report can be beneficial and helpful for the readers. Thank you.

Tangerang, February 2018

COVER PAGE	
STATEMENT OF THESIS AUTHENTICITY	
APPROVAL BY THESIS SUPERVISOR	
APPROVAL BY THESIS EXAMINATION COMMITTEE	
ABSTRACT	v
ACKNOWLEDGEMENTS	vi
TABLE OF CONTENTS	ix
LIST OF FIGURES	xi
LIST OF TABELS	xii
LIST OF APPENDICES.....	xiii
CHAPTER I INTRODUCTION	
1.1 Background	1
1.2 Research Problem	3
1.3 Objectives Problem	4
1.3.1 General Objective Problem	4
1.3.2 Specific Objective Problem	4
CHAPTER II LITERATURE REVIEW	
2.1 Packaging	6
2.1.1 Packaging in General	6
2.1.2 Active Packaging	6
2.1.3 Edible Packaging	7
2.1.4 Active Edible Film	8
2.1.4.1 Active Edible Film Materials	9
2.1.4.2 Preparation and Application of Active Edible Film	10
2.2 Sago	10
2.3 Black Cumin	14
2.4 Plasticizer	18
2.4.1 Glycerol	19
2.4.2 Water	19
2.5 Oxidation	20
2.6 Cashew Nut Sugar Stick	21
CHAPTER III RESEARCH METHODOLOGY	
3.1 Materials and Equipment	23
3.1.1 Materials	23
3.1.2 Equipment	23
3.2 Research Method	24
3.2.1 Preliminary Research	25

3.2.2.1 Verification of Antioxidant Activity of Black Cumin Seeds and Black Cumin Powdered Seeds.....	25
3.2.2 Main Research Stage I	26
3.2.3 Main Research Stage II	27
3.3 Experimental Design	29
3.2.1 Preliminary Research	29
3.3.2 Main Research Stage I	29
3.2.3 Main Research Stage II	31
3.4 Analysis Procedures	32
3.4.1 Tensile Properties.....	32
3.4.2 Water Vapour Transmission rate.....	33
3.4.3 Dissolution Time and Dissolution Temperature.....	34
3.4.4 Moisture Content	34
3.4.5 Hardness	35
3.4.6 pH	35
3.4.7 Peroxide Value Test	36
3.4.8 TBA test	37
 CHAPTER IV ANALYSIS AND DISCUSSION	
4.1 Antioxidant Activity of Black Cumin	39
4.1.1 Antioxidant Activity of Black Cumin Seeds and Black Cumin Power.....	39
4.1.2 Selected From of Black Cumin.....	40
4.2 Characteristic of Active Edible Film.....	41
4.2.1 Appearance.....	41
4.2.2 Tensile Properties.....	42
4.2.2.1 Thickness	42
4.2.2.2 Tensile Strength	44
4.2.2.3 Elongation.....	46
4.2.2.4 Young Modulus.....	49
4.2.3 Water Vapour Transmission rate	50
4.2.4 Dissolution Time and Dissolution Temperature.....	53
4.3 Selected Edible Film Formulation.....	56
4.4 Characteristic of Cashew Nut Sugar Stick-Edible Film Wrapped during Storage.....	57
4.4.1 Moisture Content.....	58
4.4.2 Hardness.....	61
4.4.3 pH.....	65
4.4.4 Peroxide Value Test	67
4.4.5 TBA test	71
 CHAPTER V CONCLUSIONS AND SUGGESTIONS	
5.1 Conclusions.....	76
5.2 Suggestions.....	77
 BIBLIOGRAPHY	78

LIST OF APPENDICES

	Page
Appendix A.	
Moisture Content.....	A-1
Appendix B.	
IC ₅₀ of Black Cumin Seeds.....	B-1
IC ₅₀ of Black Cumin Powder.....	B-2
Appendix C.	
Thickness of Active Edible Film from Sago Flour and Black Cumin Powder with Glycerol Plasticizer	C-1
Statistical Analysis of Thickness	C-2
Appendix D.	
Tensile Strength of Active Edible Film from Sago Flour and Black Cumin Powder with Glycerol Plasticizer	D-1
Statistical Analysis of Tensile Strength	D-2
Appendix E.	
Elongation of Active Edible Film from Sago Flour and Black Cumin Powder with Glycerol Plasticizer	E-1
Statistical Analysis of Elongation	E-2
Appendix F.	
Young Modulus of Active Edible Film from Sago Flour and Black Cumin Powder with Glycerol Plasticizer.....	F-1
Statistical Analysis of Young Modulus	F-2
Appendix G.	
Water Vapor Transmission Rateof Active Edible Film from Sago Flour and Black Cumin Powder with Glycerol Plasticizer.....	G-1
Statistical Analysis of Water Vapor Transmission Rate.....	G-2
Appendix H.	
Dissolution Time and Dissolution Temperatureof Active Edible Film from Sago Flour and Black Cumin Powder with Glycerol Plasticizer....	H-1
Statistical Analysis of Dissolution Time.....	H-2
Statistical Analysis of Dissolution Temperature.....	H-3
