

ACKNOWLEDGEMENTS

Praise God for His guidance and blessing that had been given unto the author to finish this thesis report entitled “FORMULA OPTIMIZATION OF CONCENTRATE DERIVED FROM JAVA TEA-BASED FUNCTIONAL DRINK”. This report was written as partial fulfillment of the academic requirements of Food Technology Study Program at Universitas Pelita Harapan to obtain the degree of *Sarjana Teknologi Pertanian Strata Satu*.

The internship program and report would not be completed without the support, assistance, and guidance from others. Hence, the author would like to express the greatest gratitude to those who has given their supports and guidance, including:

1. Mr. Eric Jobiliong, Ph.D., as Dean of Faculty of Science and Technology.
2. Mrs. Sunie Rahardja, M.S.CE., as Acting Vice Dean of Faculty of Science and Technology.
3. Mr. Laurence, M.T., as Director of Faculty of Science and Technology.
4. Ir. W. Donald R. Pokatong, M.Sc., Ph.D. as the Head of Food Technology Study Program, Faculty of Science and Technology, Universitas Pelita Harapan, Academic Advisor and thesis defense examiner for giving useful advice regarding thesis revision.
5. Prof. Dr. Ir. C. Hanny Wijaya, M.Agr., as main supervisor who had given time to patiently guide, motivate, support, and give useful advice throughout the thesis preparation until the completion of the thesis.
6. Mrs. Natania, M.Eng., as the co-supervisor who patiently guided and helped author during thesis preparation and completion of the thesis, and as the Head of Food Processing Laboratory where the author conducted the final project.
7. Dr. Ir. Hardoko MS., as thesis defense examiner for giving useful advice for thesis completion.
8. Ms. Yuniwaty Halim, M.Sc., Dr. Tagor M. Siregar, M.Si., Dr. Adolf J. N. Parhusip as Head of Laboratories (Quality Control and Research Laboratory,

Chemistry, Food Processing Laboratory, and Microbiology Laboratory, respectively) where the author conducts the final project.

9. Mr. Aji, Mr. Adi, Mr. Yosafat, Mr. Darius, Ms. Virly and Mr. Andra, for the enormous help at the laboratories.
10. All lectures of Food Technology Study Program who taught the author during studying at Universitas Pelita Harapan.
11. Beloved family including father (Fasan), mother (Lie Muk Lan), sisters (Nevilya Tjen and Febrina), and all my family for their support and prayer during thesis day and completion of report.
12. My partner in crime, Mei Diana Sonatha as my “Java tea” thesis partner for the support, help, time, accompany, and craziness during thesis days.
13. Another partner in crime, Giovani Fransisca who always supports and motivates me during thesis days.
14. Kevin Surya Permana as my supportive buddy during thesis days.
15. Andrea Angelina, Chyntia Joe Gisela, Eric, Sicilia Chandra Wijaya as friends under the same supervision group, for the time, support and discussion throughout the preparation of thesis until completion of report.
16. Ellena Yulia, Natasya Angeline, Yohanna Kristianto, Christy Nathania, Erwin Indra Wijaya and Charles Lee for the time and help during the thesis especially helping the author for antioxidant analysis, sensory evaluation preparation, and as overtime friend.
17. Stefani Sutedjo and Andreyanto Erlangga who always cheer and motivate the author during the thesis days.
18. “Centilers” – Vania Lucida, Caryn Fidelia Miranda, Jordan Bernando and Ellen Tjakrakusuma for the support during the thesis.
19. All BEM-UPH 2015/2016 members for the cheer and support to the author.
20. All friends in Food Technology cohort 2014, especially Class C for the informative sharing, discussion, and help for the thesis completion.
21. All seniors and junior of Food Technology who had helped the author as panelists for sensory evaluation and help for thesis completion.

22. All friends and close relatives who are not yet mentioned but have supported the author during the completion of thesis report.

The author is aware that this report is far from perfect. The author would welcome any criticisms and suggestions given to this report with great pleasure. Finally, the author hopes that this report would be useful for the readers. Thank you.

Tangerang, February 2018

(Rocky)

COVER	
STATEMENT OF THESIS AUTHENTICITY	
APPROVAL BY THESIS SUPERVISORS	
APPROVAL BY THESIS EXAMINATION COMMITTEE	
ABSTRACT.....	v
ACKNOWLEDGEMENTS	vi
TABLE OF CONTENTS	ix
LIST OF FIGURES.....	xii
LIST OF TABLES	xiii
LIST OF APPENDICES	xiv
CHAPTER I INTRODUCTION	
1.1 Background	1
1.2 Research Problem.....	2
1.3 Objectives.....	3
1.3.1 General Objective	3
1.3.2 Specific Objectives	3
CHAPTER II LITERATURE REVIEW	
2.1 Functional Food	4
2.2 Java Tea Based Functional Drink	4
2.3 Ingredient of Java Tea Based Functional Drink.....	5
2.3.1 Java Tea Leaves (<i>Orthosiphon aristatus</i> B.L.Miq).....	5
2.3.2 Sappan Wood (<i>Caesalpinia sappan</i>).....	6
2.3.3 Elephant Ginger (<i>Zingiber officinale var</i> <i>officinarum</i>).....	7
2.3.4 Javanese Turmeric (<i>Curcuma xanthorrhiza</i> Roxb.).....	7
2.3.5 Lime (<i>Citrus aurantifolia</i> Swingle)	8
2.3.6 Kaffir Lime (<i>Citrus hystrix</i> DC.)	8
2.4 Hydrocolloids	9
2.4.1 Guar Gum.....	10
2.4.2 Carboxymethyl Cellulose.....	10
2.4.3 Xanthan Gum	11
2.5 Response Surface Methodology (RSM).....	11
CHAPTER III RESEARCH METHODOLOGY	
3.1 Materials and Equipment	13
3.2 Research Stages.....	14
3.2.1 Research Stage I.....	14
3.2.1.1 Extraction of Mixed Simplicia	16

3.2.1.2	Extraction of Mixed Fresh Citrus	16
3.2.1.3	1% Acesulfame Stock Solution Making.....	17
3.2.1.4	1% Sucralose Stock Solution Making	17
3.2.1.5	1 % Xanthan Gum Stock Solution Making	18
3.2.1.6	Concentrate of Java Tea Based Functional Drink Making.....	18
3.2.2	Research Stage II	19
3.2.2.1	Determination of Lower and Upper Limit of Factors for Optimization.....	19
3.2.2.2	Determination of Optimum Formulation	19
3.2.2.3	Verification Test.....	20
3.2.2.4	Product Characterization of Optimal Formulation	20
3.3	Experimental Design.....	20
3.3.1	Research Stage I.....	20
3.3.2	Research Stage II	22
3.3.2.1	Determination of Lower and Upper Limit of Factors for Optimization.....	22
3.3.2.2	Determination of Optimum Formulation.....	24
3.3.2.3	Formula Optimization.....	25
3.4	Method of Analysis	26
3.4.1	Degree of Color, Hunter Method (Hutching, 1999)....	26
3.4.2	Viscosity (Nwaokoro and Akanbi, 2015)	26
3.4.3	Separation Measurement (Modification of Anggraini, 2016).....	27
3.4.4	pH Measurement (AOAC, 1995)	27
3.4.5	Total Dissolved Solids (AOAC, 1995)	27
3.4.6	Antioxidant Determination with DPPH Method (Shekhar and Anju, 2014)	28
3.4.7	Total Phenolic Content (Jothy, 2011 with modification).....	28
3.4.8	Vitamin C (Nielsen, 2010).....	29
3.4.9	Total Flavonoid Content (Prieto, 1999)	30
3.4.10	Sensory Evaluation (Meilgaard, 1999)	30

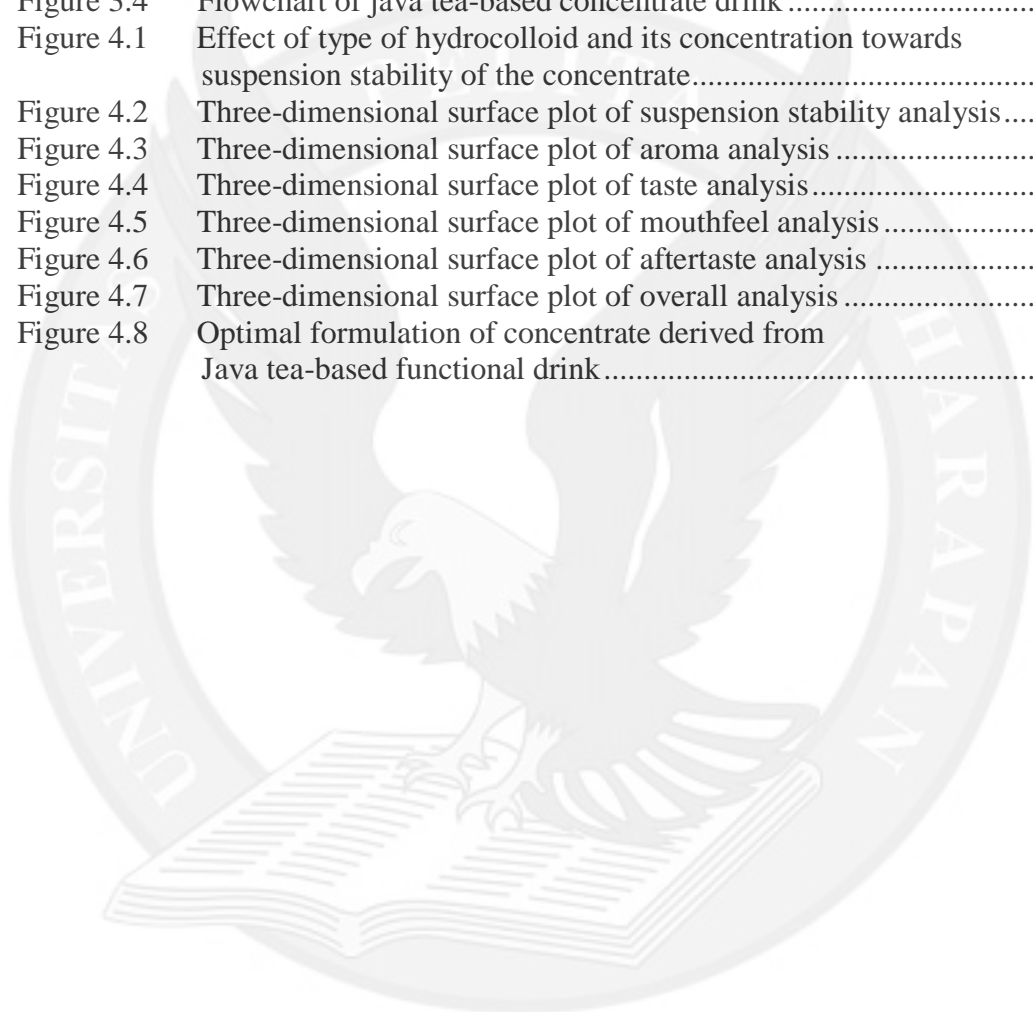

CHAPTER IV RESULTS AND DISCUSSION

4.1	Research Stage I.....	31
4.1.1	Type of Hydrocolloid Determination.....	31
4.1.1.1	Determination Based on Suspension Stability	31
4.1.1.2	Determination Based on Sensory Quality	32
4.2	Research Stage II.....	34
4.2.1	Upper and Lower Limit Determination	34

4.2.1.1 Upper and Lower Limit Determination of Guar gum Concentration.....	34
4.2.1.2 Upper and Lower Limit Determination of Intensity of Mixed Phytochemical Extract and Mixed Citrus Extract.....	36
4.2.1.3 Upper and Lower Limit Determination of Concentration of Sucrose.....	38
4.2.2 Determination of Optimum Intensity Mixed Phytochemical Extract and Mixed Citrus Extract, Guar Gum Concentration, and Concentration of Sucrose Using RSM.....	38
4.2.3 Response Analysis	39
4.2.3.1 Suspension Stability	39
4.2.3.2 Sensory Quality	42
4.2.4 Optimization of Intensity Mixed Phytochemical Extract and Mixed Citrus Extract, Guar Gum Concentration, and Concentration of sucrose	51
4.2.5 Verification Test	53
4.2.6 Product Charaterization.....	54
CHAPTER V CONCLUSIONS AND SUGGESTIONS	
5.1 Conclusions	56
5.2 Suggestions	57
BIBLIOGRAPHY	58
APPENDICES	63

LIST OF FIGURES

	page
Figure 2.1	Carboxymethyl cellulose chemical structure..... 10
Figure 3.1	Flowchart of research methodology 15
Figure 3.2	Flowchart of extraction of mixed simplicia..... 16
Figure 3.3	Flowchart of extraction of mixed citrus..... 17
Figure 3.4	Flowchart of java tea-based concentrate drink 18
Figure 4.1	Effect of type of hydrocolloid and its concentration towards suspension stability of the concentrate..... 35
Figure 4.2	Three-dimensional surface plot of suspension stability analysis.... 41
Figure 4.3	Three-dimensional surface plot of aroma analysis 43
Figure 4.4	Three-dimensional surface plot of taste analysis..... 45
Figure 4.5	Three-dimensional surface plot of mouthfeel analysis 47
Figure 4.6	Three-dimensional surface plot of aftertaste analysis 49

Table 4.11	Product profile of the optimal formulation.....55

LIST OF APPENDICES

	page
Appendix A	
Result of Suspension Stability Test for Research Stage I	A-1
Appendix B	
Scoring and Hedonic Test Questionnaire	B-1
Scoring Test Questionnaire in Research Stage I	B-1
Hedonic Test Questionnaire in Research Stage I	B-2
Hedonic Test Day 1 and 2 Questionnaire in Research Stage II	B-3
Hedonic Test Day 3 Questionnaire in Research Stage II	B-4
Scoring Test Questionnaire in Product Profile Characterization	B-5
Hedonic Test Questionnaire in Verification Test.....	B-6
Appendix C	
Result of Scoring and Hedonic Test in Research Stage I.....	C-1
Result of Scoring Test Research Stage I	C-1
Result of Hedonic Test Research Stage I	C-1
Appendix D	
ANOVA Result for Research Stage I.....	D-1
Appendix E	
ANOVA Result of Mouthfeel Likeness and Overall Acceptance of Research Stage II	E-1
Appendix F	
Result of Suspension Stability Test for Research Stage II.....	F-1
Appendix G	
Result of Sensory Test for Research Stage II.....	G-1
Appendix H	
Statistical Analyses for Determination of Optimum Formula Using RSM	H-1
Appendix I	
Result of Verification Test	I-1
Appendix J	
Result of Characterization of Optimal Formulation.....	J-1
Result of Antioxidant Activity (DPPH Method).....	J-1
Result of Total Phenolic Content of Optimum Formula	J-3
Result of Flavonoid Content of Optimal Formulation	J-4
Result of Titratable Acidity Analysis	J-5

Result of Vitamin C Analysis.....	J-5
Result of Total Soluble Solid Analysis	J-6
Result of pH Analysis	J-6
Result of Viscosity Analysis	J-6
Result of Color Analysis	J-7
Result of Sensory Scoring Test	J-7
