

## ACKNOWLEDGMENT

First and foremost, the researcher sends unending praise to the Lord for all the blessings He has given as this research was able to reach completion.

This thesis titled “HYDROPONICS ACTIVITY, A SENSE OF RESPONSIBILITY AND DECISION MAKING SKILLS (A PROGRAM EVALUATION ON GRADE V STUDENTS AT ABC ELEMENTARY SCHOOL, TANGERANG)” was created to fulfill a partial academic requirement to obtain the degree of *Magister Pendidikan* in the Faculty of Education at Universitas Pelita Harapan Jakarta.

This work was made possible because of the numerous helping hands who didn't hesitate to assist the researcher since the beginning. The researcher expresses deep gratitude to all who in many ways have contributed to bringing this research into reality:

1. Oh Yen Nie, S.E., M.Ed., as the Dean of the Faculty of Education.
2. Dr. Niko Sudibjo, S.Psi., M.A., as the Head of the Study Program.
3. M. B. Rini Wahyuningsih, Ph.D., as the thesis advisor; whom the researcher couldn't thank enough for all the patience in guiding and encouraging her throughout the process.
4. All the lecturers at Universitas Pelita Harapan who shared their knowledge, skills, stories, and time to the researcher throughout the past two years.
5. All the staff at the Faculty of Education who were always helpful from the researcher's first day at the university.

6. All the members of ABC Elementary School Tangerang (students, teachers, subject heads, executive committee members) who have open-handedly helped the researcher in connecting with the subjects and in collecting data.
7. Mom and Dad for the immeasurable love.
8. All the researcher's family members, batchmates, former & current colleagues, *Jengbadz, LF*, and friends for the moral and mental support, encouragements, and prayers.
9. All parties whose names could not be mentioned above.

Finally, the researcher understands that there are still a lot of shortcomings and things to improve on in this thesis research. With that said, the researcher welcomes any critiques and feedback from the readers for future improvements. May this thesis be useful for all those who get the chance to read it.
