ACKNOWLEDGEMENTS

All praise and glory to Lord Jesus Christ for His guidance, blessings, strength. and wisdom given to the author throughout the preparation, research, and completion of this thesis report entitled “EFFECT OF CASSAVA FLOUR TO RICE FLOUR RATIO AND CARBOXYMETHYL CELLULOSE (CMC) CONCENTRATION ON CASSAVA-RICE NOODLE CHARACTERISTICS”.

This thesis was written based on the research conducted from March 2021 to June 2021. This report was done to fulfil the academic requirements to obtain the degree of *Sarjana Teknologi Pertanian*, Food Technology Study Program, Faculty of Science and Technology, Universitas Pelita Harapan, Tangerang.

The author realizes that this thesis would not be successfully completed by the author without the help, support, encouragement, and prayers from many parties. Therefore, the author would like to acknowledge the deepest gratitude towards the parties, including:

1. Yuniwaty Halim, M.Sc., as Thesis Supervisor and as the Head of Quality Control Laboratory who has provided her time, guidance, advice, support, and effort throughout the research program and completion of the report, and for the allowing the author to conduct the thesis research in the laboratory.
2. Eric Jobiliong, Ph.D., as the Dean of Faculty of Science and Technology, Universitas Pelita Harapan.
3. Dr. Nuri Arum Anugrahati, S.Si., MP., as the Vice Dean of Faculty of Science and Technology, Universitas Pelita Harapan.
4. Laurence, S.T., M.T., as the Director of Faculty Administration and Student Affairs, Universitas Pelita Harapan.
5. Ir. Wilbur Donald Raymond Pokatong, Ph.D., as the Head of Food Technology Department, Faculty of Science and Technology, Universitas Pelita Harapan.
6. Ratna Handayani, MP., as the Deputy Head of Food Technology Department, Faculty of Science and Technology, Universitas Pelita Harapan.
7. Natania, M.Eng., as the Head of Food Processing Technology Laboratory for allowing the author to conduct the thesis research in the laboratory.

8. Mr. Regy Tahapary, Mr. Ahmad Fauzi Ridwan, Mr. Adhi, and Mr. Darius Wulakada as the laboratory officers for the help, guidance and information given to the author throughout the thesis research.
9. All lecturers and staffs of Food Technology Department who have helped and given many knowledges and support to the author throughout the study and thesis research.
10. The author's parents, Mulyadi Prijoena and Lie Giok Ing, as well as siblings, Yosephin Prijoena and Christian Kurniawan for all love, prayers, and support given to the author throughout the thesis completion.
11. Alvin Bagus, Calmness Felia Halim, Diandra Tirta Kusuma, Delvin Kho, Febiana Christy, Ida Ayu Komang Chandra Devi, Irene Natasha, Joanne Tirto, Michael Djurijanto, Saverius Chandra, Shania Edeline, Steven Ibrahim, Wilfrina Gracia, and Yesyurin Kirana as author's classmates for the endless help, supports and memories throughout the study in Food Technology.
12. Frandy Gunawan and Melvin Wayne as author's friends who had done the research together and grow together for the help and support throughout the research and thesis completion.
13. Brigitta Angelina as the author's thesis partner for the help, support, and encouragement throughout the research and thesis completion.
14. Michelle Yasuwito, Melvina Setiawan, Kevin Alfarel, Fellia Evelyn, Grace Novianti, Alfo Jordan, Shearen Alvira, Cherie Hou, Shania Oktavia, Natalia Surya, Brian Adriel, Celline Alverina, Jeremy Wijaya, Nathanael Setiady, and Alfrida Ansi for the support and prayer for the writer throughout the thesis period.
15. All friends at the even term batch of final project for the help, advice, and support throughout the research period.
16. All other friends and relatives who had not been mentioned but also took part in supporting the author throughout the thesis period.

The author is aware that there might be flaws this report. Therefore, the author apologizes for any faults during the research and the completion of this report. The author would really appreciate any criticisms and suggestions given to

this report. Finally, the author hopes that this report would be useful for the readers. Thank you.

Tangerang, August 2021

(Yolita Lilian)

CHAPTER I INTRODUCTION 1
1.1 Background 1
1.2 Research Problem 3
1.3 Objectives 4
1.3.1 General Objectives 4
1.3.2 Specific objectives 4

CHAPTER II LITERATURE REVIEW 5
2.1 Cassava 5
2.1.1 Cassava Flour 5
2.2 Rice 6
2.2.1 Rice Flour 7
2.3 Starch and Gelatinization 7
2.4 Carboxymethyl Cellulose (CMC) 9
2.5 Noodle 10
2.5.1 Noodle Analogue 13

CHAPTER III RESEARCH METHODOLOGY 14
3.1 Materials and Equipment 14
3.2 Research Method 15
3.2.1 Research Stage I 15
3.2.2 Research Stage II 16
3.3 Experimental Design 17
3.3.1 Research Stage I 17
3.3.2 Research Stage II 19

3.4 Analytical Procedures 21
3.4.1 Moisture Content (AOAC, 2005)..... 21
3.4.2 Ash Content (AOAC, 2005)..... 21
3.4.3 Fat Content (AOAC, 2005)..... 22
3.4.4 Protein Content (AOAC, 2005) 22
3.4.5 Total Carbohydrate Content (AOAC, 2005)..... 23
3.4.6 Cooking Loss (Anggraeni and Saputra, 2018 with modification) 23
3.4.7 Water Absorption (Anggraeni and Saputra, 2018 with modification) 23
3.4.8 Texture Profile Analysis (Putra, 2008) 23
3.4.9 Tensile Strength and Elongation (Nouri *et al.*, 2015) . 24
3.4.10 Hedonic Test (Lawless and Heymann, 2010) 24
3.4.11 Multiple Comparison Test (Heymann and Susan, 2016)..... 25

CHAPTER IV RESULTS AND DISCUSSIONS 26
4.1 Characteristics of Cassava-Rice Noodle with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration 26
4.1.1 Cooking Loss 26
4.1.2 Water Absorption..... 28
4.1.3 Hardness..... 30
4.1.4 Adhesiveness..... 32
4.1.5 Springiness..... 33
4.1.6 Cohesiveness..... 34
4.1.7 Tensile strength..... 36
4.1.8 Elongation 37
4.1.9 Hedonic Test 38
4.1.9.1 Taste..... 39
4.1.9.2 Aroma 40
4.1.9.3 Chewiness..... 41
4.1.9.4 Hardness 42
4.1.9.5 Adhesiveness 43
4.1.9.6 Overall 44
4.1.10 Determination of the Selected Formulation 45
4.2 Comparison of Selected Formulation of Cassava-Rice Noodle and Commercial Wheat-based noodle..... 46
4.2.1 Proximate Analysis 47
4.2.2 Cooking Loss and Water Absorption..... 49
4.2.3 Textural Properties..... 50
4.2.4 Multiple Comparison Test 53
4.2.5 Dietary Fiber and Starch Content..... 55
4.3 Comparison of Best Cassava-Rice Noodle and Noodle Analogue from Previous Research..... 56

CHAPTER V CONCLUSIONS AND SUGGESTIONS 58
5.1 Conclusions 58
5.2 Suggestions 59

LIST OF APPENDICES

Appendix A.
Moisture Content Result of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration A-1

Appendix B.
Cooking loss results of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration B-1
Analysis Statistics Results of Cooking Loss of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration B-4
Post Hoc Duncan Statistics Results of Cooking Loss of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration B-5

Appendix C.
Water Absorption result of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration C-1
Analysis Statistics Results of Water Absorption of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration C-2
Post Hoc Duncan Statistics Results of Water Absorption of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration C-3

Appendix D.
Hardness results of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration D-1
Analysis Statistics Results of Hardness of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration D-2
Post Hoc Duncan Statistics Results of Hardness of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration D-3

Appendix E.
Adhesiveness results of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration E-1
Analysis Statistics Results of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration E-2

Post Hoc Duncan Statistics Results of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration E-3

Appendix F.

Springiness Results of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration.....F-1

Analysis Statistics Results of Springiness of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration.....F-2

Post Hoc Duncan Statistics Results of Springiness of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration.....F-3

Appendix G.

Cohesiveness Results of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration..... G-1

Analysis Statistics Results of Cohesiveness of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration G-2

Post Hoc Duncan Statistics Results of Cohesiveness of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration..... G-3

Appendix H.

Tensile Strength Results of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration..... H-1

Analysis Statistics Results of Tensile Strength of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration..... H-2

Post Hoc Duncan Statistics Results of Tensile Strength of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration..... H-3

Appendix I.

Elongation Results of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration.....I-1

Analysis Statistics Results of Elongation of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration.....I-2

Post Hoc Duncan Statistics Results of Elongation of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration.....I-3

Appendix J.
Analysis Statistic Results of Hedonic Test of Taste of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration J-1
Post Hoc Duncan Statistic Results of Hedonic Test of Taste of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration J-1

Appendix K.
Analysis Statistic Results of Hedonic Test of Aroma of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration K-1

Appendix L.
Analysis Statistic Results of Hedonic Test of Chewiness of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration L-1
Post Hoc Duncan Statistic Results of Hedonic Test of Chewiness of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration L-1

Appendix M.
Analysis Statistic Results of Hedonic Test of Hardness of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration M-1

Appendix N.
Analysis Statistic Results of Hedonic Test of Adhesiveness of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration N-1
Post Hoc Duncan Statistic Results of Hedonic Test of Adhesiveness of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration N-1

Appendix O.
Analysis Statistic Results of Hedonic Test of Overall Acceptance of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration O-1
Post Hoc Duncan Statistic Results of Hedonic Test of Overall Acceptance of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio O-1

Appendix P.
Moisture content result of selected noodle analogues and commercial noodle P-1

Appendix Q.
Ash content of selected noodle analogues and commercial noodle Q-1
Fat content of selected noodle analogues and commercial noodle..... Q-1
Protein content of selected noodle analogues and commercial noodle Q-2
Carbohydrate content on selected noodle analogues and commercial noodle Q-3

Appendix R.
Cooking Loss Result of Selected Noodle Analogues and Commercial Noodle..... R-1
Water Absorption of Selected Noodle Analogues and Commercial Noodle..... R-2

Appendix S.
Hardness Results of Selected Noodle Analogue and Commercial Noodle S-1
Adhesiveness Results of Selected Noodle Analogue and Commercial Noodle.....S-1
Springiness Results of Selected Noodle Analogue and Commercial Noodle.....S-2
Cohesiveness Results of Selected Noodle Analogue and Commercial Noodle.....S-2
Tensile Strength Results of Selected Noodle Analogue and Commercial Noodle.....S-3
Elongation Results of Selected Noodle Analogue and Commercial Noodle.....S-3

Appendix T.
Post Hoc Duncan Statistics Results of Moisture Content of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration and Commercial Noodle T-1
Post Hoc Duncan Statistics Results of Ash Content of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration and Commercial Noodle T-1
Post Hoc Duncan Statistics Results of Fat Content of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration and Commercial Noodle T-1
Post Hoc Duncan Statistics Results of Protein Content of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration and Commercial Noodle T-2
Post Hoc Duncan Statistics Results of Carbohydrate Content of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration and Commercial Noodle T-2

Post Hoc Duncan Statistics Results of Cooking Loss of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration and Commercial Noodle T-2
Post Hoc Duncan Statistics Results of Water Absorption of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration and Commercial Noodle T-3
Post Hoc Duncan Statistics Results of Hardness of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration and Commercial Noodle T-3
Post Hoc Duncan Statistics Results of Adhesiveness of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration and Commercial Noodle T-3
Post Hoc Duncan Statistics Results of Springiness of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration and Commercial Noodle T-4
Post Hoc Duncan Statistics Results of Cohesiveness of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration and Commercial Noodle T-4
Post Hoc Duncan Statistics Results of Tensile Strength of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration and Commercial Noodle T-4
Post Hoc Duncan Statistics Results of Elongation of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration and Commercial Noodle T-5

Appendix U.
Post Hoc Dunnett Statistics Results of Multiple Comparison of Noodle Analogue with Variation of Cassava Flour and Rice Flour Ratio and CMC Concentration and Commercial Noodle U-1

Appendix V.
Dietary Fiber and Starch Content Results of Noodle Analogue Made with 100:0 cassava flour and rice flour ratio and 3% CMC V-1
Dietary Fiber and Starch Content Results of Noodle Analogue Made with 75:25 cassava flour and rice flour ratio and 2.5% CMC V-2
Dietary Fiber and Starch Content Results of Noodle Analogue Made with 75:25 cassava flour and rice flour ratio and 3% CMC V-3
Dietary Fiber and Starch Content Results of Commercial Noodle..... V-4

Appendix W.
Hedonic Test Questionnaire W-1

Appendix X.
Multiple Paired Comparison Test Questionnaire X-1

Appendix Y.
Certificate of Analysis of Noodle Analogue' Emulsifier Y-1

Appendix Z.
Mixture of 75:25 Cassava Flour and Rice Flour ratio and CMC 2.5% and pregelatinized cassava flour and rice flour Z-1
Steaming Process of Noodle Analogue Made with 75:25 Cassava Flour and Rice Flour ratio and CMC 2.5% Z-1
Extrusion of Noodle Analogue Made with 75:25 Cassava Flour and Rice Flour ratio and CMC 2.5% Z-1
Cooked Noodle Analogue Made with 75:25 Cassava Flour and Rice Flour ratio and CMC 2.5% Z-1
