

## ACKNOWLEDGEMENTS

The author would like to express gratitude and praise to Lord Jesus Christ for His blessings and guidance throughout the final project and the thesis report completion with the title of “THE UTILIZATION OF PECTIN FROM PAPAYA PEEL IN EDIBLE COATING MAKING TO EXTEND THE SHELF LIFE OF FRESH-CUT APPLE”. This thesis was written as the partial fulfilment of the academic requirement to obtain the degree of Sarjana Teknologi Pertanian Strata Satu, Food Technology Study Program, Faculty of Science and Technology, Universitas Pelita Harapan, Tangerang.

The thesis report could not have been accomplished without the help and supports of many parties. Therefore, the author would like to express a sincere gratitude to:

1. Mr. Eric Jobiliong, Ph.D., as the Dean of Faculty of Science and Technology.
2. Ms. Dela Rosa, S.Si., M.M., M.Sc., Apt. as Vice Dean of Faculty of Science and Technology.
3. Mr. Laurence, M. T. as director of Faculty of Science and Technology.
4. Mr. Ir. W. Donald R. Pokatong, M. Sc., Ph.D, as the Head of Food Technology Study Program who has given the author a chance to conduct this research as final project.
5. Ms. Yuniwaty Halim, M.Sc., as thesis supervisor for the guidance, informations, corrections, and time given from the beginning of thesis proposal until its completion.

6. Ms. Yuniwaty Halim, M.Sc., Natania, M.Eng, Dr. Adolf J. Parhusip, and Dr. Tagor M. Siregar, Heads of Quality Control, Research, Food Processing, Microbiology, and Chemistry Laboratories, respectively.
7. Mr. Adhi, Mr. Adzie, Mr. Yosafat, and Mr. Darius for all the help and time during laboratory activities.
8. Beloved parents and family for their support, help, and care during the thesis project.
9. Felicia Agustin and Livia Katherina, as fellow edible coating research partners, for all the time, help, and shared experience throughout the thesis project.
10. Benedictus Dustin Hendarlim, Cynthia Saputra, Fransiska Rusli, and Freddy Chayadi, as friends under same supervision, for the support throughout the final project.
11. Celine Tanuwijaya, Felicia Agustin, Gracia Angelina, Jennifer Alvionita, Joanina, Jonathan Christianto, Tiffany Nathalie, Nabillah C D, Jesseline and all friends from Food Technology 2015 of Universitas Pelita Harapan.
12. Roland Setiawan, and all friends from GKY Pluit church for the endless prayer and moral support.

The author realizes that this report is not perfect and many improvements are still needed. Therefore, the author would welcome any criticisms or suggestions to improve this report. Lastly, the author hopes that this report could be helpful and informative to the readers. Thank you.

Tangerang, February 2019

(Carinna Ruth Darmawan)

## TABLE OF CONTENTS

	page
COVER	
STATEMENT OF THESIS AUTHENTICITY	
APPROVAL BY THESIS SUPERVISOR	
APPROVAL BY THESIS EXAMINATION COMMITTEE	
ABSTRACT.....	v
ABSTRAK.....	vi
ACKNOWLEDGEMENTS.....	vii
TABLE OF CONTENT.....	x
LIST OF FIGURES.....	xiii
LIST OF TABLES.....	xv
LIST OF APPENDICES.....	xvi
CHAPTER I INTRODUCTION	
1.1 Background.....	1
1.2. Research Problem.....	3
1.3 Objectives.....	4
1.3.1 General Objectives.....	4
1.3.2 Specific Objectives.....	4
CHAPTER II LITERATURE REVIEW	
2.1 Overview of Papaya.....	5
2.2 Edible Films or Coatings.....	7
2.2.1 Components of Edible Film or Coating.....	8
2.2.1.1 Starch.....	8
2.2.1.2 Pectin.....	9
2.2.1.2.1 Extraction of Pectin.....	10
2.2.1.3 Plasticizer.....	11
2.2.1.3.1 Glycerol.....	12
2.2.2 Important Characteristics of Edible Film or Coating.....	13
2.2.2.1 Water Vapor Transmission Rate.....	13
2.2.2.2 Thickness.....	14
2.2.2.3 Tensile Strength and Elongation.....	14
2.3 Apple ( <i>Malus sylvestris</i> ).....	15
CHAPTER III RESEARCH METHODOLOGY	
3.1 Materials and Equipment.....	17
3.2 Research Method.....	18
3.2.1 Preliminary Step.....	18
3.2.1.1 Papaya Peel Powder Preparation.....	18
3.2.1.2 Extraction of Pectin.....	19
3.2.2 Main Research.....	20
3.2.2.1 Research Stage I.....	20
3.2.2.2 Research Stage II.....	22

3.3 Experimental Design.....	23
3.3.1 Research Stage I.....	23
3.3.3 Research Stage II.....	25
3.4 Method of Analysis.....	27
3.4.1 Yield of Papaya Peel Powder.....	27
3.4.2.1 Moisture Content Analysis (AOAC, 2007).....	28
3.4.2.2 Ash Content Analysis (AOAC, 2007).....	28
3.4.2.3 Protein Content Analysis (AOAC, 2007).....	28
3.4.2.4 Fat Content (AOAC, 2007).....	29
3.4.2.5 Carbohydrate Content (By difference method) (AOAC, 2007).....	30
3.4.3 Pectin Characterization.....	30
3.4.3.1 Yield (Altaf <i>et al.</i> , 2015).....	30
3.4.3.2. Equivalent Weight (Akili <i>et al.</i> , 2012).....	30
3.4.3.3 Methoxyl content (Akili <i>et al.</i> , 2012).....	31
3.4.3.5 Degree of Esterification (DE) (Akili <i>et al.</i> , 2012).....	32
3.4.4 Edible Film Characterization.....	32
3.4.4.1 Tensile strength and elongation.....	32
3.4.4.2 Thickness (Guo <i>et al.</i> , 2012).....	32
3.4.4.3. Water Vapor Transmission Rate (WVTR) (ASTM, 1995).....	32
3.4.5 Fresh-cut Apples Quality Assessment.....	33
3.4.5.1 Color (Nielsen, 2014).....	33
3.4.5.2 Hardness (Chiabrando and Giacalone, 2013).....	33
3.4.5.3 Weight loss (AOAC, 1994).....	33
3.4.5.4 Total Dissolved Solids (°Brix) (AOAC, 2007).....	33
3.4.5.5 Total Titratable Acidity (TTA) (Chiabrando and Giacalone, 2013).....	34
3.4.5.6 Total Plate Count (TPC), Yeast and Molds.....	34
<b>CHAPTER IV RESULTS AND DISCUSSION</b>	
4.1 Characteristics of Papaya Peel Powder.....	36
4.2 Characteristics of Pectin from Papaya Peel Powder.....	37
4.2.1 Pectin Yield.....	37
4.2.2 Moisture Content.....	38
4.2.3 Ash Content.....	39
4.2.4 Equivalent Weight.....	39
4.2.5 Methoxyl Content.....	40
4.2.6 Galacturonic Acid Content.....	41
4.2.7 Degree of Esterification (DE).....	42
4.3 Edible Film Characteristics.....	42
4.3.1 Thickness.....	43
4.3.2 Water Vapor Transmission Rate.....	44
4.3.3 Tensile Strength.....	46
4.3.4 Elongation.....	48
4.3.5 Selected Edible Film Formulation.....	50

4.4 Effect of Edible Coating Application on Fresh-cut Apples Quality during Storage .....	51
4.4.1 Color (Lightness) .....	52
4.4.1.1 Room Temperature Storage .....	52
4.4.1.2 Refrigeration Temperature Storage .....	53
4.4.2 Weight Loss .....	55
4.4.2.1 Room Temperature Storage .....	55
4.4.2.2 Refrigeration Temperature Storage .....	56
4.4.3 Hardness .....	57
4.4.3.1 Room Temperature Storage .....	57
4.4.3.2 Refrigeration Temperature Storage .....	58
4.4.4 Total Titratable Acidity (TTA) .....	60
4.4.4.1 Room Temperature Storage .....	60
4.4.4.2 Refrigeration Temperature Storage .....	61
4.4.5 Total Dissolved Solid (TDS) .....	63
4.4.5.1 Room Temperature Storage .....	63
4.4.5.2 Refrigeration Temperature Storage .....	64
4.4.6 Microbial Count .....	66
4.4.6.1 Total Plate Count .....	66
4.4.6.1.1 Room Temperature Storage .....	66
4.4.6.1.2 Refrigeration Temperature Storage .....	67
4.4.6.2 Yeast and Molds Count .....	68
4.4.6.2.1 Room Temperature Storage .....	68
4.4.6.2.2 Refrigeration Temperature Storage .....	69
 CHAPTER V CONCLUSIONS AND SUGGESTIONS	
5.1 Conclusions .....	72
5.2 Suggestions .....	73
 BIBLIOGRAPHY .....	74
APPENDICES .....	80

## LIST OF FIGURES

## LIST OF TABLES

	page
Table 2.1 The proximate composition of papaya peel .....	7
Table 2.2 Chemical composition of <i>Malus sylvestris mill</i> .....	15
Table 3.1 Formulation for edible film making .....	21
Table 3.2 Experimental design of research stage I .....	25
Table 3.3 Experimental design of stage II for room temperature storage .....	27
Table 3.4 Experimental design of stage II for refrigeration temperature storage .	27
Table 4.1 Yield and proximate analysis of papaya peel powder.....	36
Table 4.2 Yield and characteristics of pectin extracted from papaya peel powder ..	37

## LIST OF APPENDICES

	page
Appendix A	
Analyses Result of Papaya Peel Powder .....	A-1
Yield of Papaya Peel Powder .....	A-1
Moisture Content of Papaya Peel Powder .....	A-1
Ash Content of Papaya Peel Powder .....	A-2
Protein Content of Papaya Peel Powder .....	A-2
Fat Content of Papaya Peel Powder .....	A-3
Carbohydrate Content of Papaya Peel Powder .....	A-3
Appendix B	
Analyses Result of Pectin Extracted from Papaya Peel Powder.....	B-1
Yield of Pectin Extracted from Papaya Peel Powder .....	B-1
Moisture Content of Pectin Extracted from Papaya Peel Powder.....	B-1
Ash Content of Pectin Extracted from Papaya Peel Powder.....	B-2
Equivalent Weight of Pectin Extracted from Papaya Peel Powder.....	B-2
Methoxyl Content of Pectin Extracted from Papaya Peel Powder .....	B-3
Degree of Esterification of Pectin Extracted from Papaya Peel Powder	B-4
Appendix C	
Analyses Result of Edible Films Made of Different Pectin and Starch Concentrations.....	C-1
Thickness of Edible Films Made of Different Formulations .....	C-1
Water Vapor Transmission Rate (WVTR) of Edible Films Made of Different Formulations .....	C-4
Tensile Strength of Edible Films Made of Different Formulations .....	C-12
Elongation of Edible Films Made of Different Formulations .....	C-15
Appendix D	
Colour (Lightness) Analyses Result of Fresh-cut Apples.....	D-18
Room Temperature Storage .....	D-18
Refrigeration Temperature Storage.....	D-20
Appendix E	
Weight Loss Analyses Result of Fresh-cut Apples.....	E-1
Room Temperature Storage .....	E-1
Refrigeration Temperature Storage.....	E-4
Appendix F	
Hardness Analyses Result of Fresh-cut Apples .....	F-1
Room Temperature Storage .....	F-1
Refrigeration Temperature Storage.....	F-3

Appendix G.	
Total Titratable Acidity (TTA) Analyses Result of Fresh-cut Apples....	G-1
Room Temperature Storage .....	G-1
Refrigeration Temperature Storage.....	G-5

Appendix H	
Total Dissolved Solid (TDS) Analyses Result of Fresh-cut Apples .....	H-1
Room Temperature Storage .....	H-1
Refrigeration Temperature Storage.....	H-4

Appendix I	
Microbial Count Analyses Result of Fresh-cut Apples.....	I-1
Total Plate Count (TPC).....	I-1
Room temperature Storage.....	I-1
Refrigeration temperature Storage .....	I-4
Yeast and Molds Count.....	I-7
Room temperature Storage.....	I-7
Refrigeration Temperature Storage.....	I-10
