Kata Kunci: *Perceived Value, Convenience, Functional Quality, Service Quality, Brand Trust, Customer Employee Engagement, Perceived Risk, Perceived Usability, Digital Banking Innovation, Customer Experience, Customer Satisfaction*, dan *Customer Loyalty*.

ABSTRACT

The development of mobile banking in Indonesia is increasing every year. This also has an impact where competition in the mobile banking industry is becoming increasingly fierce. BCA Mobile is one of the mobile banking services operating in Indonesia. With this increasing competition, BCA Mobile must maintain and maintain customer loyalty for both old and new users.

The research aims to determine the effect of perceived value, convenience, functional quality, service quality, brand trust, customer employee engagement, perceived risk, perceived usability, and digital banking innovation on customer loyalty through customer experience and customer satisfaction. The benefit of this research is to add insight, especially to find out how big the influence of customer experience and customer satisfaction is so that it can increase customer loyalty to BCA Mobile application users in Manado.

This research is a causal research using quantitative methods and processed with the help of a statistical program, SPSS version 22.0. Data was collected by distributing questionnaires using the snowball sampling technique to 182 respondents with the characteristics of the respondents, male and female, domiciled in Manado, aged 18-60 years, have become BCA customers within the last 1 year, have independently installed the BCA application Mobile for at least the last 6 months, transact using the BCA Mobile application more than 3 times in the last 6 months, and have contacted BCA customer service in the last 6 months.
