**THE DESCRIPTION OF QUALITY OF WORK LIKE UNIVERSITY X
MARKETING AND ADMISSION EMPLOYEES**
(xii + 39 pages; 2 pictures; 19 tables, 72 appendixes)

University is the next level of study in which individuals attend to study their major interests and talent. University marketing and admission bureaus have an important role in marketing their institute . This study aims to see the description of the quality of work life for University X marketing and admission staff with quality of work life scale by Rostiana, Zamralita, and Suyasa (2015). This research is a descriptive analysis and used a purposive sampling method in distributing questionnaires. Quality of work life scale consists of ten dimensions; job characteristics, social relevance of employer, co-worker, personal development, pay benefit, work balance, promotion, work condition, supervisory, and work culture. This study has 32 participants which shows moderate value quality of work life with a percentage of 62.5%. This study showed that the co-worker dimension gets the highest average value which is 3.91 and the promotion dimension gets the lowest average value which is 2.52. University X is advised to maintain the highest three dimensions (co-worker, work culture, work condition) and improve other dimensions in order to increase employees quality of work life that affect employees productivity, commitment, satisfaction, and spirit.

GAMBARAN KUALITAS KEHIDUPAN KERJA KARYAWAN BIRO MARKETING DAN ADMISI UNIVERSITAS X (xii + 39 halaman: 2 gambar; 19 tabel; 72 lampiran)

Perguruan tinggi merupakan jenjang studi berikutnya yang mempelajari jurusan sesuai minat, bakat individu. Biro *marketing* dan admisi perguruan tinggi memiliki peran penting dalam memasarkan perguruan tinggi. Penelitian ini bertujuan untuk melihat gambaran kualitas kehidupan kerja pada karyawan biro *marketing* dan admisi Universitas X dengan menggunakan alat ukur kualitas kehidupan kerja Rostiana, Zamralita, dan Suyasa (2015). Penelitian ini merupakan analisis deskriptif dan menggunakan teknik metode *purposive sampling* dalam menyebarkan kuesioner. Alat ukur kualitas kehidupan kerja terdiri dari sepuluh dimensi yaitu *job characteristic, social relevance of employer, co-worker, personal development, pay benefit, work balance, promotion, work condition, supervisory, and work culture*. Penelitian ini memiliki total 32 responden yang menunjukkan bahwa kualitas kehidupan kerja karyawan biro *marketing* dan admisi memiliki nilai sedang dengan persentase 62.5%. Ditemukan dimensi *co-worker* merupakan dimensi yang mendapatkan nilai rata-rata paling tinggi yaitu 3.91 dan dimensi *promotion* merupakan dimensi terendah dengan nilai rata-rata 2.52. Universitas X disarankan untuk mempertahankan dimensi tiga tertinggi (*co-worker, work culture, work condition*) dan meningkatkan aspek-aspek dimensi lainnya agar dapat meningkatkan kualitas kehidupan kerja karyawan yang berpengaruh dengan produktivitas, komitmen, kepuasan dan semangat kerja karyawan.

Kata Kunci :kualitas kehidupan kerja; karyawan universitas; biro *marketing* dan admisi
