THE ROLE OF THE NOTARY IN THE SALE AND BUYING OF SHARE TRANSACTIONS OF NON-EXCHANGE LIMITED COMPANIES TOWARDS TAXPAYER COMPLIANCE AND TAX RECEIPT IN THE DIGITAL ERA

(92 pages, 1 image, 1 attachment)

One of the contributors to the payment of Income Tax (PPh) is the profit from the sale of shares of Non-Exchange Limited Liability Companies. The sale and purchase transaction of non-exchange company shares is followed by a sale and purchase deed drawn up before a notary. Notaries have an obligation to provide data and information related to taxation to the Directorate General of Taxes. Regarding the fulfillment of obligations and payment of taxes by taxpayers who carry out sale and purchase transactions of non-stock company shares, there are still PPh disputes that are submitted for appeal by taxpayers to the Tax Court. Therefore it is necessary to conduct research on the role of a notary in the sale and purchase of non-exchange limited liability company shares towards taxpayer compliance, as well as the implementation of a deed of sale and purchase of shares by a notary can increase taxpayer compliance and tax revenue in the digital era. In this study, data collection was carried out using a statutory approach as well as a case approach. From the results of this study, it is concluded that notaries have a very important role in buying and selling transactions of non-exchange company shares so that they play a role in increasing taxpayer compliance. Increasing tax revenue for the state can be maximized in this digital era, shortly after the process of making a Sale and Purchase Deed for the sale and purchase transaction of non-exchange company shares carried out before a Notary.
