THE EFFECT OF SHORT WAITING TIME, INTERPERSONAL COMMUNICATION, ENVIRONMENT, AND SERVICE QUALITY ON PATIENT SATISFACTION AT RSUD KANJURUHAN'S DENTAL CLINIC, KABUPATEN MALANG, JAWA TIMUR

Abstract: This study aims to determine the effect of the variable short waiting time, interpersonal communication, environment, service quality on patient satisfaction at RSUD Kanjuruhan's Dental Clinic. The model of this research was tested on a population of outpatients who had received treatment using a purposive sampling technique and obtained a sample size of 389 people in the period 15 November 2023 – 15 February 2024. Data collection was carried out online via a Google Form questionnaire using a Likert scale of 1 -5. The analysis method uses the SEM-PLS (Structural Equation Modelling based on Partial Least Square) technique using the SmartPLS 4.0 application. The results of this study show that: (1) there is a positive and significant effect between short waiting times and patient satisfaction at RSUD Kanjuruhan's Dental Clinic, (2) there is a positive and significant effect between interpersonal communication and patient satisfaction at RSUD Kanjuruhan's Dental Clinic, (3) there isn't positive and not significant effect between environment and patient satisfaction at RSUD Kanjuruhan's Dental Clinic, (4) there is a positive and significant effect between service quality and patient satisfaction at RSUD Kanjuruhan's Dental Clinic.

Keywords: Short waiting time, Interpersonal communication, Environment, Service Quality, Patient's Satisfaction
