ANTECEDENTS OF TRANSFORMATIONAL LEADERSHIP AND ITS IMPLICATIONS FOR THE WORK PERFORMANCE OF PUSKESMAS EMPLOYEES: AN EMPIRICAL STUDY OF 11 PUSKESMAS IN NORTH MINAHASA DISTRICT, 2024

(xvii + 104 pages; 18 figures; 35 tables; 9 appendices)

This research aims to analyze the direct relationship between the antecedents of Transformational Leadership and Work Performance of Employee and its implications in 11 Community Health Centers in North Minahasa Regency. This research uses a quantitative research design. Data collection used a non-probability sampling technique with a purposive sampling method. Data collection was carried out through questionnaires and Google forms which were distributed and filled in by 100 community health center employee respondents. Respondents' answers were then processed using inferential statistical methods through a structural equation modeling (SEM) approach using the SmartPLS® 4.0.9.6 software system. The results show that Idealized influence, Inspirational motivation, Intellectual stimulation, Individualized consideration have a positive influence on work performance of employee. The findings of this research can be used by community health center leaders and management to improve work performance. Judging from the lowest statement, Puskesmas employees should be given career development opportunities through relevant training, workshops and courses to improve employee skills and knowledge as well as providing support in the form of counseling or guidance for employees who experience difficulties or stress at work.
