PT. Selamat Sukses Abadi is a marketing office that operates independently and is the sixth Panin Dai-ichi Life marketing point in the North Sumatra region whose address is Jalan Mayjend. Sutoyo Siswomiharjo No. 101-A Medan. With the current tight competition in the insurance sector and the number of agents who are increasingly skilled when making offers to consumers, the company's sales level is less than its target or expectations. Based on initial observations, the decrease in consumer purchasing decisions for the company's products and services is attributed to several factors such as personal selling, trust, relationship marketing, and brand equity.

This study targets all consumers who purchased the company's products in 2023, totaling 2,184 people. Using Slovin's formula with a 90% confidence level and a 10% margin of error, a sample size of 96 will be selected. The sampling method is probability, specifically simple random sampling, where respondents are chosen based on chance or random encounters. Data validity and reliability will be assessed, and analysis will be conducted in SPSS 26.0, including tests for normality, heteroscedasticity, multicollinearity, and linearity. Further analysis includes linear and multiple regression, coefficient of determination, and hypothesis testing using F- and t-tests.

The study has indicated that partially and simultaneously, personal selling, trust, relationship marketing, and brand equity has a significant effect on purchase decision at PT. Selamat Sukses Abadi CBD Polonia Medan.
