***THE INFLUENCE OF PERCEIVED USEFULNESS OF ONLINE REVIEWS,
TRUST, AND PERCEIVED RISK ON ONLINE PURCHASE INTENTION ON
THE BUKALAPAK E-COMMERCE PLATFORM***

(xvii + 164 ; 8 images ; 24 tables)

This study aims to analyze the influence of perceived usefulness of online reviews, trust, and perceived risk on online purchase intention on the Bukalapak e-commerce platform. This research employs the PLS-SEM method to analyze data collected from 200 respondents residing in Jabodetabek who are e-commerce users and are familiar with Bukalapak but have never used it. The results indicate that: 1) perceived usefulness of online reviews positively influences trust, 2) trust negatively influences perceived risk, 3) perceived usefulness of online reviews does not have impact on online purchase intention, 4) trust positively influences online purchase intention, 5) perceived risk negatively influences online purchase intention, 6) trust mediates the relationship between perceived usefulness of online reviews and online purchase intention, and 7) perceived risk mediates the relationship between trust and online purchase intention. These findings suggest that Bukalapak should enhance the quality of displayed online reviews, strengthen platform security to build consumer trust, and reduce perceived risks to increase purchase intention on their platform.
