THE IMPACT OF PROFITABILITY TOWARDS BENCHMARK BEHAVIORAL MODEL

(xvi+70 pages; 5 figures; 14 tables; 2 appendices)

This study examines the impact of profitability towards Benchmark Behavioral Model during 2021-2023, where businesses are recovering post COVID-19 pandemic. Net Profit Margin coefficient measures profitability. The Corporate Tax to Turnover Ratio coefficient measures the Benchmark Behavioral Model. The research method used in this study is a quantitative approach. The study population is all manufacturing companies listed on the Indonesian Stock Exchange (IDX) during the 2021-2023 observation period. The study uses a purposive sampling method with data from the company's financial statements. The analysis is conducted using IBM SPSS 23.0, which is software for analyzing data and performing statistical calculations, both parametric and non-parametric, on a Windows basis. Using 218 firm-year observations and multiple linear regression model, the study shows the result that profitability has a significant positive impact towards Benchmark Behavioral Model during the period of 2021-2023, where it can be concluded that Benchmark Behavioral Model can be the basis to conduct decision-making related to financial management and assessment of company's taxation compliance.

PENGARUH PROFITABILITAS TERHADAP BENCHMARK BEHAVIORAL MODEL

(xvi+70 halaman; 5 gambar; 14 tabel; 2 lampiran)

Penelitian ini mengkaji pengaruh profitabilitas terhadap Benchmark Behavioral Model selama tahun 2021-2023, dimana bisnis sedang dalam masa pemulihan pasca pandemi COVID-19. Koefisien Net Profit Margin mengukur profitabilitas. Koefisien Corporate Tax to Turnover Ratio mengukur Benchmark Behavioral Model. Metode penelitian yang digunakan dalam penelitian ini adalah pendekatan kuantitatif. Populasi penelitian adalah seluruh perusahaan manufaktur yang terdaftar di Bursa Efek Indonesia (BEI) selama periode pengamatan tahun 2021-2023. Penelitian ini menggunakan metode purposive sampling dengan data berupa laporan keuangan perusahaan. Analisis dilakukan dengan menggunakan IBM SPSS 23.0 yang merupakan perangkat lunak untuk menganalisis data dan melakukan perhitungan statistik baik parametrik maupun non-parametrik berbasis Windows. Dengan menggunakan 218 observasi firm-year dan model regresi linier berganda, penelitian ini menunjukkan hasil bahwa profitabilitas memiliki pengaruh positif yang signifikan terhadap Benchmark Behavioral Model selama periode 2021-2023, dimana dapat disimpulkan bahwa Benchmark Behavioral Model dapat menjadi dasar untuk melakukan pengambilan keputusan terkait pengelolaan keuangan dan penilaian kepatuhan perpajakan perusahaan.

Kata Kunci: Profitability, Net Profit Margin, Benchmark Behavioral Model, Corporate Tax to Turnover Ratio
