

GLOSARIUM

Sinaps	: titik sambungan antara dua sel syaraf (<i>neuron</i>) dengan adanya perubahan keseimbangan aktivitas dalam jaringannya.
Mekanisme plastisitas sinaptik lintas	: titik sambungan antara dua sel syaraf (<i>neuron</i>).
<i>Repetitive vocal tics</i>	: gerakan suara yang dilakukan secara berulang dan tidak terkontrol.
<i>Finger flicking</i>	: gerakan dimana seseorang menjentikkan jarinya berulang-ulang atau secara cepat. Pada umumnya melibatkan ibu jari dan telunjuk.
Elastomer	: jenis bahan polimer yang memiliki sifat elastis atau karet, yang dapat mengembalikan bentuknya semula setelah diregangkan atau dikompresi. Elastomer memiliki kemampuan untuk berubah bentuk (misalnya, memanjang atau menekan) dan kemudian kembali ke bentuk semula tanpa kerusakan.
Viskositas	: Merupakan ukuran ketebalan atau kekentalan suatu cairan yang menunjukkan sejauh mana cairan tersebut mengalir, karena semakin tinggi viskositas,

semakin kental pula cairan tersebut, dan semakin lambat ia mengalir.

Vulkanisasi

: proses ikatan silang molekul sehingga mengubah karet menjadi kuat, tahan lama dan elastis.
